 Part V	 99
Student Life and Activities	
Alphabetical List of 1964-65 Graduates and Students	
With Their Addresses	101
 Index	 128

This **Bulletin**, embracing both a "Catalog" for 1965-66 and "Announcements" for the 1966-67 regular session is designed to answer most of the questions about the Mississippi Gulf Coast Junior College District which can be answered in one conveniently sized annual publication. It is supplemented by a **Student Handbook**, issued to each member of the student body, and a **Faculty Handbook** - these two handbooks being revised when necessary.

HOW TO USE THIS BULLETIN

The plan of this **Bulletin** is shaped by its question-answering purpose. It assumes that the prospective student and parent will want to ask questions in the following categories:

- (1) The general purpose and objectives of the Mississippi Gulf Coast Junior College District: its philosophy and aims.
- (2) The physical plant and facilities available to the college district for achieving its purpose.
- (3) The cost of these academic and other services to the student; and the student employment and scholarship aids available to help meet the cost.
- (4) The curricular and other services offered by the college district to fulfill its purpose.
- (5) Student life and activities.

Hence, as the Table of Contents indicates, following after the listing of supervisors, trustees, administrative officers and faculty, the bulk of the **Bulletin** is divided into five numbered parts.

Part I — THE MISSISSIPPI GULF COAST JUNIOR COLLEGE DISTRICT'S PURPOSE AND OBJECTIVES emphasizes the college's philosophy, aims and objectives, defining the place of the Mississippi Gulf Coast Junior College District in its regional, state and national higher-educational setting.

Part II — BUILDINGS, GROUNDS AND EQUIPMENT - is a detailed description of the facilities at the District campuses.

Part III — FINANCIAL INFORMATION - summarizes both expenses and the scholarship and other aids available to help meet these expenses.

Part IV — ACADEMIC PROGRAM - is obviously and logically the largest and most attention-requiring section of the entire **Bulletin**.

Because of its length and complexity, Part IV is sub-divided as follows (see also Table of Contents):

- A. General Academic Requirement and Regulations.
- B. Suggested Programs of Study.
- C. Alphabetical Listing and Description of Numbered Courses.

Part V — is a summary of STUDENT LIFE AND ACTIVITIES, which can be supplemented by reference to the current **Student Handbook**.

Following the five-part exposition, this **Bulletin** includes an alphabetical listing of the past year's graduates and students, with their addresses - a feature which has been part of every **Bulletin** issued in Perkinson's half century of growth.

The Index at the end supplements and recapitulates the Table of Contents at the beginning.

Since timetables and schedules are very important in planning, we begin this question-answering **Bulletin** with some sets of calendars: regular calendars for 1966 and 1967, and a combined school and financial calendar for the same two years, calling attention to the most important dates.

COLLEGE CALENDAR 1966-67

Friday, April 22, 1966 — Deadline for current students to select and reserve a room for the 1966-67 session by paying matriculation fee. After this date, current students lose their priority in reserving rooms.

Saturday, August 13, 1966 — Students pre-registering after this date must wait until school begins for entrance tests; they will pay a \$6.00 testing fee and will register with the final group.

Wednesday, August 31 through Saturday, September 3, 1966, 9:30 A.M. - Faculty Pre-School Workshop.

First Semester, 1966-67

Monday, September 5, 1966

First semester room rent and first month's board and maintenance due. Also, non-resident tuition for out-of-state students.

12:00 noon - Cafeteria opens.

1:00 P.M. - Dormitories open.

7:00 P.M. - Christian Council program in Gregory Chapel.

Tuesday, September 6, 1966

8:20 A.M. - General assembly in auditorium for all students.

8:45 A.M. - Sophomore registration.

Freshmen orientation.

1:00 P.M. - Freshmen begin registration.

Testing of new applicants.

6:30 P.M. - Dormitory house meetings.

8:00 P.M. - Get acquainted party in gymnasium for students and faculty.

Wednesday, September 7, 1966

8:15 A.M. - Freshmen continue registration.

1:00 P.M. - Freshmen complete registration.

6:00 P.M. - Picnic supper for students and faculty.

Students registering after this date will be charged a \$4.00 Late Registration fee and a \$7.00 Testing fee.

Thursday, September 8, 1966

Classes begin.

6:30 P.M. - Organization of evening classes.

Monday, September 12, 1966

8:00 P.M. - President's reception for students and faculty.

6:30 P.M. - Evening class registration.

Monday, September 26, 1966

Last day a student may withdraw from a course without receiving a grade.

Last day a student may enter a first semester course.

Monday, October 3, 1966

Second month's board and maintenance due.

Monday, October 31, 1966

Third month's board and maintenance due.

Friday, November 4, 1966

First nine-week term ends. Grade reports sent.

Wednesday, November 23, 1966

Thanksgiving holidays begin after Wednesday's classes and extend until 8:00 A.M., Monday, November 28.

Monday, November 28, 1966

Fourth month's board and maintenance due.

Friday, December 16, 1966

After classes, Christmas holidays begin.

Tuesday, January, 1967

8:00 A.M. - Classes resume after Christmas holidays.

Monday, January 9, 1967

Fifth month's board and maintenance due.

Friday, January 20, 1967

First semester ends.

Second Semester

Monday, January 23, 1967

Registration. Second semester matriculation fee and room rent due; also non-resident tuition for out-of-state students.

Tuesday, January 24, 1967

Registration continues.

Wednesday, January 25, 1967

8:00 A.M. - Classes begin.

Students registering after 12:00 noon will be charged a \$4.00 Late Registration fee and a \$7.00 Testing fee.

6:30 P.M. - Organization of evening classes.

Monday, January 30, 1967

6:30 P.M. - Evening class registration.

Monday, February 6, 1967

Sixth month's board and maintenance due.

Monday, February 13, 1967

Last day a student may withdraw from a course without receiving a grade. Last day a student may enter a second semester course.

Monday, March 6, 1967

Seventh month's board and maintenance due.

Thursday, March 23, 1967

Nine-week term ends. Grade reports sent.

Thursday, March 23, 1967

Science and Mathematics	Quincy Long, Chairman Sylvester D'Aquila, Co-Chairman
Voc. Tech. and Off-Campus Programs	M. H. Guess, Chairman

Discipline: Lipscomb, Cadle, Shows, Beachem.**Faculty Reception and Courtesy:** Lee, Carlisle, Mathis.**Graduation:** Graves.**Guidance:** Vierling, Shows, Cadle, Lipscomb.**Library:** Burford, Douglas, Couch, Lane, Graves, Weems, Cadle.**Physical Education and Health Service:** Beachem, Weems, Kingman, Richardson.**Publications:** Douglas, Lisotta, Cadle, H. Malone.**Social Life:** Weems, Beachem, Cadle, President of Student Council.

FACULTY

(Dates in parentheses indicate first year of service at the Mississippi
Gulf Coast Junior College District)

- J. J. Hayden, Jr. (1950) District President
B.S. and M.S., Mississippi State University; Additional study at University
of Mississippi.
- L. A. Krohn (1952) Adm. Ass't in Charge of Business Affairs
B.S. and M.A., University of Southern Mississippi.
- William H. Byrd (1965) Director of Publicity
B.A., George Washington University.
- Barry L. Mellinger (1963) Vocational-Technical Coordinator
B.S. and M. Ed., Mississippi State University.

PERKINSTON COLLEGE

- Sydney Alexander (1960) English
B.S. and M.A., University of Southern Mississippi;
Graduate study, University of Southern Mississippi.
- John P. Bacon, Jr. (1965) Social Studies
M.S. and B.S., University of Southern Mississippi.
- G. Woodfin Breland, Jr. (1959) Drafting
B.S., Mississippi State University; M.S., University of Southern Miss.
- Gerald Buchanan (1959) Librarian
B.A., William Carey College; M.S., University of Southern Mississippi;
Additional study at Louisiana State University and University of Southern
Mississippi.
- Robert Burnham (1965) English
B.A. and M.S., University of Southern Mississippi.
- Kathryn M. Carey (1953) Music
B.M., Oberlin Conservatory of Music; M.M.E., University of Southern
Mississippi; Additional study at University of Pittsburg, University of
Colorado, Pennsylvania State College, New York University, University of
Michigan, American University.
- Oscar Eugene Clement (1949) Music
B.M. and M.M., University of Southern Mississippi.
- Harry P. Dayton (1960) Education and Psychology
B.A., Mississippi College; M.A., University of Southern Mississippi;
Th.M., New Orleans Baptist Theological Seminary; Additional study at
the University of Southern Mississippi and Harding College; Graduate
work, University of Mississippi.
- Randle J. Dedeaux (1949) Drafting
B.S., Louisiana State University; M.F., Duke University.
- Glen E. Endris (1965) Business Education
B.S. and M.S., University of Southern Mississippi.
- Kenneth C. Farris (1962) Health and Physical Education
B.S. and M.E., University of Southern Mississippi.
- Addie Mae Faust (1957) Science
B.S., Mississippi State College for Women.

- K. P. Faust (1943) Science
B.S., Millsaps College; Additional study at University of Tennessee Medical School; University of Mississippi; University of Southern Mississippi.
- Nora Graves (1951) English
B.A., Millsaps College; M.A., University of Mississippi; Graduate study at University of Wisconsin, Vanderbilt University, Doctoral study, University of Southern Mississippi.
- Word Guild (1964) Languages
B.A., Mississippi State College for Women; M.A., University of Southern Mississippi.
- Earline Hart (1959) (1963) Mathematics
B.S., University of Southern Mississippi; M.A., George Peabody College.
- Lillian A. Hayden (1962) Developmental Reading
B.S., History, University of Southern Mississippi; M.S., Psychology of Reading, University of Southern Mississippi.
- Thomas E. Hilbun (1965) Guidance Counselor
B.A., Mississippi College; Additional study at Mississippi State University.
- Sam P. Jones (1952) Music
B.M., Southeastern Louisiana College.
- Samuel A. Lewis (1964) Social Studies
B.S. and M.S., University of Southern Mississippi; Additional study at University of Southern Mississippi.
- Herschel Woodley Lott (1960) English
B.S. and M.A., University of Southern Mississippi; Additional study at Tulane University.
- Nelda Lott (1960) English
B.S. and M.A., University of Southern Mississippi.
- Jananna McInnis (1946) Home Economics
B.S., Mississippi State College for Women; M.S., Mississippi State University
- Kay W. McInnis (1960) Business Education
B.S. and M.S., University of Southern Mississippi.
- John McQuagge (1964) Recreation Director and Physical Education
B.S. and M.S., University of Southern Mississippi.
- Mary Miller (1965) Business Education
B.S. and M.S., University of Southern Mississippi.
- Guy D. Moffett (1952) Science
B.S. and M.A., University of Southern Mississippi; Additional study at University of Texas and Bucknell College.
- Winfred Moffett (1951) Industrial Arts
B.S., Mississippi State University; M.E., University of Southern Miss.
- Charles G. Odom (1955) Dean
B.S. and M.A., University of Southern Mississippi; Additional Study, Mississippi State University and Louisiana State University.

- Charlie H. Probst (1959) Director of Student Services
B.S. and M.A., University of Southern Mississippi;
Additional Study, University of Mississippi.
- Homer Rainwater (1960) Science
B.S., Mississippi State University; M.S., Indiana University; Additional
study, University of California at Los Angeles.
- Barbara A. Ross (1960) Health and Physical Education
B.S. and M.S., University of Southern Mississippi; Additional study at
University of Southern Mississippi.
- David G. Sansing (1960) Social Studies
B.A. and M.A., Mississippi College; Additional study, University of
Southern Mississippi.
- Billy J. Scarbrough (1961) Mathematics
B.S., Mississippi State University.
- George Sekul (1961) Coach and Physical Education
B.S. in Business Administration, M.E. in Education Administration,
University of Southern Mississippi.
- James Shill (1961) Agriculture and Farm Management
B.S. and M.S., Mississippi State University; Additional study,
Louisiana State University.
- Clyde Strickland (1960) Science
B.S., M.S. and M.E., University of Southern Mississippi.
- Darrell Stringer (1965) Speech
B.A., William Carey College; M.A., University of Southern Mississippi.
- L. D. Stringfellow (1965) Mathematics
B.S. and M.S., University of Southern Mississippi.
- William Therrell (1963) Social Studies
B.S. and M.A., Mississippi State University.
- Jeanette Thomas (1961) Business Education
B.S. and M.S., University of Southern Mississippi.
- Bennie T. Warren (1958) Baptist Student Union Director
B.S., William Carey College; M.R.E., New Orleans Baptist Theological
Seminary.
- Robert W. Weathers (1960) Health and Physical Education
B.S. and M.S., University of Southern Mississippi.
- Bondy A. Welch (1964) Automobile Mechanics
The David Rankin, Jr., "School of Mechanical Trades," St. Louis, Missouri
Training Course, Fort Benning, Georgia, Instructor Training Course, Fort
Chaffee, Arkansas.
- Harold Wesson (1962) Coach
B.S. and M.A., University of Southern Mississippi;
Additional study, George Peabody College.

JACKSON COUNTY JUNIOR COLLEGE

- Richard J. Beck (1955) Electronics
B.E.E., Polytechnic Institute of Brooklyn.
- Theo R. Cowser (1958) Electronics
Graduate of Sioux Falls Air Force Technical School; Cooks Radio Broadcast Engineering School; Keegans Technical Institute; Additional study at University of Southern Mississippi.
- Curtis Lee Davis (1950) Dean
B.S., Mississippi State University; M.S., University of Southern Mississippi; Additional study at University of Southern Mississippi.
- Jane Dukes (1965) Business Education
B.S. and M.A., University of Southern Mississippi.
- Raleigh Travis Ferguson (1965) Coordinator Supervisor Ingalls Div.
B.S., Mississippi State University; Additional study at Mississippi State University.
- Marshall A. Glazebrook (1965) Vocational Counselor
B.S., Virginia Military Institute; M.S., University of Southern Mississippi.
- Gustaf Linwood Johansson (1962) English
B.A., University of Southern Mississippi; M.A., George Peabody College.
- Robert L. Hollingsworth (1966) Biology
- Charles A. Keith (1965) Physical Education
B.S., University of Southern Mississippi; M.S. (August 1966), University of Southern Mississippi.
- Carlana L. Lane (1965) English
B.A., Mary Baldwin College; M.A., Tulane University.
- Royce B. Luke (1965) Director of Student Services
B.S. and M.A., University of Southern Mississippi; Additional graduate study at Mississippi State University.
- Billy Jack Lofton (1964) Mathematics
B.S., University of Southern Mississippi; M.S., University of Mississippi.
- Charles L. Munroe (1959) Related Technology
B.S., Carnegie Institute of Technology; Air War College; Industrial College of the Armed Forces; Air Corps Engineering School.
- Frances Murry (1965) Librarian
B.A., University of Southern Mississippi; M.A., Peabody Library College.
- Bobbie Pearson (1965) Physical Education
B.S. and M.S., University of Southern Mississippi.
- Harold Rouse (1965) Business Administration
- William D. Ruddiman (1965) Social Studies
B.A., Vanderbilt University; M.A., George Peabody College.
- Gilbert Shaw (1966) Electronics
- Harmon Dean Shaw, Jr. (1965) Social Studies
B.A., Millsaps College; M.A., Mississippi State University.
- Thomas Ralph Smith (1965) Mathematics
B.S., Louisiana College; M.S., University of Southern Mississippi.
- Amaryllis J. Stroud (1965) Developmental Reading
B.S. and M.E., University of Southern Mississippi.

**JACKSON COUNTY JUNIOR COLLEGE
AND
JEFFERSON DAVIS JUNIOR COLLEGE**

- Walter R. Dunn (1965) Physics and Slide Rule
B.S. and M.A., University of Southern Mississippi.
- Kathleen Ellis (1965) Languages
B.A., Agnes Scott College; Graduate study at University of Guadalajara,
Mexico; University of Southern Mississippi.
- William Howard Lane (1965) Chemistry
B.S., University of Southern Mississippi; M. Ed., Mississippi State
University.
- Lucas P. Lisotta (1962) Speech
B.S., Northeast Louisiana State College; M.A., Louisiana State University.
- James P. Mathis (1965) Art
Diploma, Martin Junior College; B.A., Mississippi College;
Graduate study at Mississippi College, University of Southern Mississippi.
- Clifton D. Taylor (1965) Music
B.M.E., University of Southern Mississippi; M.M.E., (August 1966)
University of Southern Mississippi.

JEFFERSON DAVIS JUNIOR COLLEGE

- Evelyn Alford (1964) Practical Nursing
Diploma, School of Nursing, New Biloxi Hospital; Additional study,
University of Mississippi.
- Ruby Winston Beachem (1965) Physical Education
B.S., Mississippi State College for Women; M.A., University of Southern
Mississippi.
- James V. Burford (1962) Librarian
B.A., University of Mississippi; Graduate study in English at Columbia,
University; M.A. in Library Science at Peabody Library School, Peabody
College, Nashville, Tennessee.
- H. Hilman Butler (1965) Mathematics
B.S. and M.S., University of Southern Mississippi.
- Glen W. Cadle (1961) Director of Student Services
B.S. and M.S., University of Southern Mississippi.
- Robert Fairfax Couch (1959) Social Studies
B.S. and M.S., University of Southern Mississippi.
- Mary Rebecca Craven (1964) Practical Nursing
Diploma, Mercy Hospital, Vicksburg, Mississippi; B.S., N. Ed., Louisiana
State University.
- Sylvester D'Aquila, Jr. (1960) Mathematics
B.S. and M.S., University of Southern Mississippi.
- G. L. Douglas (1965) English and Literature
B.A., William Carey College; M.S., Auburn University.
- Ollie P. Eason (1965) English
B.S. and M.A., Peabody College; MSW, Tulane University.
- Mary Easterwood (1964) Practical Nursing
Diploma, St. Joseph's Hospital; Additional study at Perkinston College.
- Kenneth Paul Gilliard (1965) Industrial Electricity
- Joseph O. Goforth, Jr. (1965) Developmental Reading
B.A., Syracuse University; M. Ed., University of Southern Mississippi.

- Mary Elaine Graves (1958) Business Education
B.S. and M.E., University of Southern Mississippi.
- Merrell Hillman Guess (1965) Mechanical Draftsman
B.S., Engineering, Mississippi State University.
- Rosemary Henrion (1964) Nursing
Diploma, St. Mary's School of Nursing; B.S., University of Texas.
- Louise Jones (1964) Practical Nursing
Diploma, Charity Hospital School of Nursing, New Orleans, Louisiana;
Additional work at University of Mississippi.
- Margaret Kingman (1960) Director of Nursing
Diploma in Nursing, Loma Linda University; B.S.N. Ed., Columbia Union
College; Additional study at Woman's Hospital of New York City;
University of Florida; West Virginia University.
- Betty June Lee (1965) Business Education
B.S., Mississippi State College for Women; M.E., Mississippi State
University.
- William P. Lipscomb, Jr. (1953) Dean
B.S., M.A. and Ed. D., University of Southern Mississippi;
Graduate study at University of Texas.
- Joan Lauraine Livingston (1963) Nursing
M.S.C.W., Two years; A.S., Perkinson College, Nursing Program;
Additional study at the University of Southern Mississippi.
- Quincy A. Long (1965) Biology
B.S. and M.S., University of Southern Mississippi; Additional study at
University of Southern Mississippi and Gulf Coast Research Laboratory.
- Betty P. Malone (1959) English
B.A., William Carey College; Graduate work, University of Southern
Mississippi.
- Howard Malone (1963) Data Processing and Accounting
B.S., University of Southern Mississippi; M. Ed., Mississippi State
University.
- Daphne Richardson (1964) Practical Nursing
B.S., Millsaps College, Diploma, Methodist Hospital, Memphis, Tennessee.
- Carlie D. Scofield (1965) Air Conditioning and Refrigeration
Perkinson College.
- Kathryn Sebastian (1965) Nursing
B.S., University of Maryland.
- Charles R. Shows (1965) Social Studies and Psychology
B.S. and M.A., University of Southern Mississippi.
Additional study, University of Southern Mississippi.

- Robert T. Smith (1965) Business Data Processing
EDP, Perkinson College.
- Harry W. Stamps (1962) Social Studies
B.S. and M.S.E., Mississippi College; Additional study at Mississippi
State University.
- William S. Thornton (1963) Economics and Business Administration
B.S. and M.S., University of Southern Mississippi; Additional study at
University of Southern Mississippi; University of Missouri.
- William L. Vierling (1965) Director of Admissions and Guidance
B.S., M.A., University of Southern Mississippi; Additional study,
Mississippi College.
- Fred W. Weems (1965) Health and Physical Education
B.S., William Carey College.
- Mary Wenger (1965) Practical Nursing
B.S., Goshen College.

PART I

PURPOSE AND OBJECTIVES The basic purpose of Perkinston has never changed. The catalog announcing the first 1912 session stated: "The purpose of this school is to give as thorough preparation as possible for complete living . . . to educate as well as instruct, to form character as well as give information . . ."

The current statement of purpose, aims, and objectives as adopted by the District Board of Trustees is as follows:

PURPOSE The general purpose of this junior college district is to develop the cultural, intellectual, and character resources of the people of this area, point the way to an economic livelihood based on natural resources, and promote responsible citizenship.

SPECIFIC AIMS Our more specific aims are to provide at the lowest possible cost:

1. General education.
2. Training for employment after leaving junior college.
3. Preparation for higher education.
4. Guidance: personal, education, and vocational.
5. A wide variety of student activities.
6. Services as a community center.
7. Opportunities for cultural enrichment.

MEETING OBJECTIVES Perkinston College and the two branch colleges, Jefferson Davis Junior College and Jackson County Junior College, by various surveys and studies, have developed a curriculum to meet the needs of each individual student. It is apparent that the program of studies must be diversified, functional and practical, with an appeal to many types of student interest and ability.

The Mississippi Gulf Coast Junior College District Board of Trustees, the administration, the faculty, and the communities which support the district, are making sincere efforts to meet these objectives by the following means:

1. An intellectual program of studies.
2. A guidance program.
3. A number of work scholarships to enable students to earn part of their college expenses.
4. A Student Council.
5. A Christian Council.
6. A well-rounded program of student activities.
7. A worthwhile program of community services.

JUNIOR COLLEGES

Community junior colleges, closely associated with their own supporting districts in a planned statewide system, are an educational feature which Mississippi has helped pioneer.

What are community junior colleges? Where do they fit into the American educational pattern, and how important are they?

The Report of the President's Commission on National Goals, detailing its "Programs for Action in the Sixties", puts the junior college at the very center of its recommendations for higher education, emphasizing:

"... there should be roughly within commuting distance of every high school graduate ... an institution that performs the following functions:

- (a) offers two-year terminal programs for students not going on to a four-year college career.
- (b) offers transfer programs for students who do wish to complete a four-year program.
- (c) serves as a technical institute for the community, serving local needs for vocational and sub-professional education.
- (d) offers continuing education for adults."

The Report concludes: "These institutions have a critically important job to do."

The Southern Regional Education Board in its current report of The Commission on Goals for Higher Education in the South recommends that "Each state should develop a strong system of two-year community colleges ... neither mere extensions of the high school nor decapitated versions of the four-year college "they" can serve a variety of functions for which four-year institutions are not required. Among these are freshmen and sophomore college courses, vocational and technical programs, guidance and counseling services, specific programs to meet community needs, and adult education."

The Board concludes: "The community college is economical for both student and taxpayer. It can be responsive to local needs and a vital force in the community."

The 1961 Report of the Kellogg Foundation summarizes: "The community college is one of the most significant educational innovations of this century ... a complex multi-purpose institution which differs basically in character from both the senior college and the high school ... a new and evolving entity created to meet the new demands and new functions of our rapidly changing society ... no other type of college is tied so closely to the local community ... Their programs are flexible, yet complete. One major phase provides terminal curriculum opportunities tailored to the industrial job-training needs of the particular community and expediting vocational retraining at a time when technological change is resulting in occupational disruptions and displacements. Another greatly significant curriculum area is that of liberal arts and pre-professional courses ... not only to enhance culture and deeper understanding but also to facilitate the transfer of students to four-year colleges and universities for junior and senior classwork.

And through serving people of all ages and economic classes and comprising literally thousands of hours of evening instruction, the community college also provides continuing education. In serving both youth and adults, these colleges place a strong emphasis on the instructional program, with a philosophy of giving needed individual attention to students and of confining classes to small units.

"More and more, the community college appears destined to become the normal stepping stone in higher education as the rising costs of financing state universities and other factors cause state legislators to look for new solutions to the growing demand for mass education. The obvious answer is the assignment of upper division professional training, research, and graduate education to the university, and the allotment of lower division liberal arts, technical-vocational training, and adult education to local community colleges."

Obviously, then, the community junior college is the growing point in American higher education, both nationally and regionally. It is this uniquely promising community-college pattern into which Perkinson will fit its second half-century of growth.

Perkinson, in fact, has helped to establish that pattern, having been in its first half century a living witness of the junior college virtues of low cost, quality instruction, individual guidance and counseling, curriculum balance, administrative flexibility, and quick responsiveness to local needs.

HISTORY

In the summer of 1911 the Harrison County School Board established the Harrison County Agricultural High School, which marked the beginning of the present institution. To induce the Board to locate the school at Perkinson, C. C. Swetman, Walt Davis, Rev. R. N. Davis, W. W. Farnsworth, Van O'Neal, T. T. Garner, E. Garner, Dantzler Lumber Company, and a number of other citizens donated 656 acres of land and 626 dollars. In 1916 Stone County was formed from the northern part of Harrison County, and the two counties continued to operate the high school jointly thereafter.

Perkinson "grew up" in the 1925-26 session with the addition of a college freshman class, adding sophomore courses in the next year. In the summer of 1926 Jackson County joined Harrison and Stone Counties in support of the new two-year college curriculum; and George County added its support to the other three in 1941.

At the end of the 1961-62 session Perkinson discontinued operation of the high school; and in the same year approved a "master plan" for eventual expansion of the junior college to at least two new campuses to be located nearer the centers of population along the Gulf Coast strip - one in Harrison County and one in Jackson County - in addition to the existing Perkinson campus. In the same Fiftieth Anniversary Year, therefore, Perkinson ended one major chapter of its pioneering story and began a yet bigger one.

In May, 1962, the Governor of Mississippi signed into law House Bill 597 creating the Mississippi Gulf Coast Junior College District. Perkinson College operates as a part of this legal district.

Perkinson College and its two branch colleges, Jefferson Davis Junior College and Jackson County Junior College, are fully accredited by the Mississippi Association of Colleges, and the Southern Association of Colleges and Schools. This means that students transferring to other institutions will receive full recognition for credits earned at the colleges provided the courses are in line with courses to be pursued later.

PERKINSTON'S The 1961 Perkinson "Self Study", prepared by the faculty prior to evaluation by the Southern Association accrediting commission, summed up its PROMISE analysis of Perkinson's purpose in these two paragraphs:

"The best evidence that the essential purpose of Perkinson College is as fixed as a guiding star is the obvious awareness of each high school graduate within the four-county area that Perkinson has put college-level education within his reach. In this sense, Perkinson has long since achieved its basic goal - - and will continue to achieve it."

"Having assured the promise of college education to every high school graduate in its area, Perkinson College and its two branch colleges, Jefferson Davis Junior College and Jackson County Junior College, are now spelling out the same basic purpose to other age groups by expanding their curriculum scope as rapidly as firm demand areas become discernible. Here also, the ultimate purpose remains the same: that no potential college student - - of any age, with any interest - - will be 'left out'."

PART II

BUILDINGS, GROUNDS AND EQUIPMENT

PERKINSTON
COLLEGE

Perkinston College is located on US Highway 49 at Perkinston, thirty miles north of the Mississippi Gulf Coast in the heart of the long-leaf pine region of Mississippi. Excellent highways make it readily accessible to all parts of the supporting area. Its proximity to a number of larger towns and cities makes it possible for students to explore a wealth of off-campus cultural opportunities.

The college owns 642 acres of land at Perkinston, 30 acres of which make up the main campus, with the remainder devoted to dairying and pasture, tree farming, and feed production. The campus buildings are conveniently located, and the grounds are beautifully landscaped.

The principal buildings are identified as follows (see map on inside of back cover):

Bennett Hall, a three-story brick building, is one of the original campus structures, which for a number of years was used for high school classes. (This structure is presently being used on a limited basis.)

Denson Hall, built in 1929, is a two-story brick structure housing the 700-capacity auditorium. The first floor contains business education department, and other classrooms. The offices of the Director of Instruction and Supervision and Director of Publicity are in the basement of this building. Offices for the Bulldog Barks, Perkulator, and Footprints staff are located on the second floor.

Darby Hall is a two-story brick structure built in 1957. The administrative offices are housed on the first floor. The "book" portion of the library occupies the second floor and currently shelves approximately 11,000 volumes and provides study table space for 120 readers.

Smith Hall is a two-story brick veneer building constructed in 1947, which contains classrooms and faculty offices.

Hinton Hall is a modern fireproof structure specifically designed for science teaching. Built in 1959, it has no interior corridors; and access to all lecture rooms and laboratories is from a covered walkway around an open garden at the building's center.

Heidelberg Hall, constructed in 1959, houses the cafeteria and music facilities. The main floor of this single-story, three-level building is the cafeteria, which also includes a private dining room. Music facilities on two lower levels in an outer ring include band and choir rehearsal rooms, classrooms, practice and teaching studios.

Megehee Building. This new structure, occupied in the spring of 1962, contains a living suite and bedrooms, a foods laboratory and a clothing laboratory.

Wentzell Center, constructed in 1957, houses the campus bookstore, grill, and postoffice, in addition to the main gymnasium with a seating capacity of 1800.

The original Gymnasium, one of the first in South Mississippi was constructed in 1929, and is now used for dances and other recreational activities in addition to the physical education program.

The Colmer Vocational-Technical Building, constructed in 1950, houses faculty offices, classrooms, laboratories, tool rooms, and work areas for carrying out vocational-technical training.

Gregory Chapel was completed in 1947 and provides a place for all types of religious functions. It houses offices of the B.S.U., Wesley Foundation, and the Newman Club.

Harrison Hall, a dormitory for women students, was constructed in 1938 and was renovated and refurnished in 1957.

Fahnestock Hall, a two-story brick dormitory constructed in 1929, houses women on the upper floor and faculty on the lower floor.

George Hall is a two-story brick dormitory for male students constructed in 1947. This building houses approximately 100 students and includes two faculty apartments.

Jackson Hall is a two-story brick dormitory for male students constructed in 1925 and completely renovated in 1956. The building houses approximately 55 students, and includes one faculty apartment.

Stone Hall is a two-story brick dormitory for male students constructed in 1915 and completely renovated in 1956. It houses approximately 55 students and includes one faculty apartment. The ground level accommodates the periodicals division of the Library and photography studio and darkroom.

Huff Hall is a two-story brick dormitory for male students. Constructed in 1911, this is the oldest building on the campus. It was partially renovated in 1952, and additional improvements were effected in 1956 and 1963. This building contains a faculty apartment and houses 55 male students.

A. L. May Memorial Stadium, constructed in 1948, has a seating capacity of 5,000 and includes a press box, dressing room and storage area for equipment. The stadium is completely fenced and provides a football playing field and a quarter-mile track with 220 straightway.

The Swimming Pool, constructed in 1953, is seventy-five feet in length and provides dressing facilities for women and men.

The Apartment Dormitory is a brick two-story building, built in 1948, which furnishes living accommodations to faculty members. The Infirmary and nurse's apartment are located on the first floor of this building. The second floor houses female students.

Faculty Residences include sixteen houses and three duplexes which are located on or adjacent to the college campus.

BUILDINGS, GROUNDS, AND EQUIPMENT**JACKSON
COUNTY
COLLEGE**

Jackson County Junior College is located on four-laned U.S. Highway 90 at Gautier, Mississippi, approximately five miles west of the historical city of Pascagoula, in the booming Gulf Coast Area. A network of excellent State and County highways connecting with Highway 90 makes this College readily accessible to all communities in the supporting area.

The Campus consists of ninety-two acres of thinly wooded, slightly rolling terrain as it extends northward toward the Mary Walker Bayou and famous fishing area. The eastern section has been cleared to provide an air strip adequate for landing single-engine planes. On the south boundary, a two thousand foot frontage along U. S. Highway 90 permits the public a view of the campus buildings, compactly arranged in a newly landscaped area, some three hundred yards back from the highway.

The three principal buildings constituting the physical plant of the College are of concrete construction, color engineered, fully air conditioned and connected in a continuous line by covered walkways.

Building "A" the largest of the three, is a single story, circular building, two hundred and forty feet in diameter and houses the administrative offices, faculty offices, general academic classrooms, science lecture halls and laboratories, business machine and language laboratories, television central control station, studio, and broadcasting room, and the college library. All rooms are units in a closed TV circuit and local telephone system.

Building "B", partly a two-story construction, houses the Vocational-Technical phase of the college curriculum. In this building are the classrooms and work shops used by the Drafting and Design Technology Department, the Electronics Department, and the Mechanical Technology Department. The facilities in these rooms are of the latest design and equipment. Also located in this building is the central power plant furnishing heat, air conditioning, and water facilities to the college complex.

Building "C", a two-story structure, is also a circular building, slightly smaller in area than Building "A". It contains the art and music classrooms, physical education shower and dressing rooms, the campus Book Store, faculty dining room, student center, student dining area and lounge.

A large, exterior, athletic area exists adjacent to this building, as well as a large, black top area offering adequate parking facilities for all personnel.

BUILDINGS, GROUNDS AND EQUIPMENT**JEFFERSON
DAVIS
COLLEGE**

In September of 1965 the Jefferson Davis Branch of Perkinston College began its operation after several years of planning and a record-breaking period of actual construction. The campus is located on 120 acres of land between Biloxi and Gulfport, 1¼ miles north of U. S. Highway #90. Twelve air-conditioned buildings house the indoor activities of the college connected by covered walks forming landscaped courts between the buildings. These covered walks not only form a sheltered passage between the buildings, but also serve as a continuous utility chase for air conditioning, water, gas and electricity and form a visual tie for the building complex.

The buildings constructed in this initial stage were designed to accommodate 850 students with plans for expansion to accommodate 1,400 students by 1972. Realistically, more than 850 students can be accommodated even in the early stages of development through careful scheduling and better than average capacity usage.

The entire plant is built on reinforced concrete footings and grade beams with concrete floor slab. Structural steel columns and beams are employed with open web steel joists. Roof decking is 2½ inch lightweight insulating concrete on structural metal deck. Floor covering includes ceramic tile, carpeting, vinyl asbestos tile and terrazo located in appropriate areas for most adequate usage. A central plant supplies hot and chilled water to individual buildings. Some buildings have central air handling unit and duct distribution while others have ventilators in each room. Lighting generally is 277 volt high output fluorescent with some incandescent lighting. Included is a system for intercommunication, clock and program system, and provisions for future campus dial telephone system.

The buildings on the Jefferson Davis College campus are as follows:

Building A - Vocational - Technical: Houses two large laboratories, a general classroom, and adequate storage rooms and office spaces for three instructors. These are presently employed for instruction in Refrigeration and Air-Conditioning and Industrial Electricity but are flexible enough to accommodate additional programs if changes demanded. Connecting to this building and the Business building is the Drafting and Mechanical Drawing Laboratory which includes a office and adequate storage room.

Building B - Business: Houses six offices for instructors, Business Data Processing laboratory and equipment, Accounting room, Typing and secretarial procedures rooms, office machines' room, and a general classroom.

Building C - Administration: Has facilities for handling student admission, guidance activities, the registrar's function and campus finance. Offices include those of the Dean of the College, Director of Student Services, Director of Admission and Guidance, and secretaries.

Building D - Fine Arts: Houses a music department consisting of three studios, four practice rooms, a work room, storage rooms and a large multi-purpose room for choir, orchestra or group meetings. Also in this complex is an art studio, office and storeroom. This studio can be used for art and ceramics and opens onto a large patio for outdoor instruction.

Building E - Nursing: Houses six offices for instructors, a lecture room, and a Nursing laboratory.

Building F - Science: Houses five offices for instructors, two large lecture rooms, Physics laboratory, Inorganic Chemistry laboratory, Organic Chemistry laboratory, General Biology laboratory, and a specialized Biology laboratory to accommodate Microbiology. Each laboratory adjoins spacious storerooms and preparation rooms.

Building G - Faculty Offices: Houses 22 offices for faculty members using the Academic building, a secretarial pool area, workroom, and faculty lounge.

Building H - Academic: The building houses twelve general classrooms of varying sizes and a language laboratory fully equipped. Classrooms in this building are used interchangeably by the instructors to teach most of the general education courses.

Building I - Library: Contains a large reading area furnished with various size tables and chairs, reading area for periodicals and reference materials, a number of carrels for individual study, and bookshelves. The librarian's and assistant librarian's offices plus a large workroom are adjacent. Five special study or listening rooms provide privacy for small groups. A reading laboratory, reading instructor's office, audio-visual pre-viewing room, and an audio-visual equipment room are also included.

Building J - Student Center: Provides facilities to accommodate student and faculty needs. Student lockers, bulletin boards, automatic food dispensers, telephones, lounging area for television and music listening plus dining area, food preparation and service area, office for manager, workrooms and storage, plus a bookstore, are all housed here. Opening onto the northside covered walkway are Student Council, Annual, Newspaper, and Conference rooms for student use.

Building K - Service Building: Contains a central control room for air-conditioning and heating regulation plus office for Superintendent of Buildings and Grounds, storage room for receiving of incoming supplies plus the mechanical equipment room housing the heating and cooling equipment, the condensing unit, and water well storage tank.

Building L - Physical Education: This building contains dressing rooms, showers for students, storage, equipment and offices for physical education instructors and is adjacent to a covered recreational area providing space for physical activities and calisthenics.

PART III**FINANCIAL INFORMATION****A. EXPENSES****Categories of Students (By Costs)**

In terms of cost, there are five major classes of District students:

- (1) Residents of the four tax-supporting counties of Harrison, Stone, Jackson, and George.
- (2) Residents of other Mississippi counties.
- (3) Out-of-state students.
- (4) Special students.
- (5) Evening-college students.

There is no tuition cost at the Mississippi Gulf Coast Junior College District for classes (1) and (2). The only tuition charges are for: (3) out-of-state students, who are currently charged \$150.00 per semester, in addition to the other fees listed and described below; (4) special students, who are charged a tuition fee of \$10.00 per semester hour, as detailed below; and (5) evening-college students, whose tuition fees depend on the particular course and the enrollment in that course.

For **bona fide** Mississippi residents from other counties than Harrison, Stone, Jackson, and George (category 2), there is no tuition fee. However, a maintenance fee is charged, in addition to the other fees listed and described below. This fee is \$10.00 per month for students residing in a county providing tax support to a junior college. For those students residing in counties that provide no tax support to a junior college, the fee is \$20.00 per month.

There is neither tuition nor maintenance charged to regular students from Harrison, Stone, Jackson, and George Counties. Costs to students in this first category can be summarized as follows:

A. For non-dormitory, commuting "day" students free transportation is offered in District buses in George and Stone Counties.

1. A matriculation fee of \$50.00 per semester, which covers the services detailed under its description below.
2. Relatively minor special and miscellaneous fees listed and described below.

B. For dormitory students.

1. The same \$50.00 per semester matriculation fee.
2. The same special and miscellaneous fees described below.
3. Room rent of \$45.00 per semester.
4. Board of \$34.00 per month (84 meals).

List of Major Fees and Charges

MATRICULATION — A fee of \$50.00 per semester is charged all full-time students. Applicants for dormitory rooms should pay this fee as early in advance as possible, in order to select and reserve rooms. Both dormitory and day students alike should pay this fee for the first semester of the 1966-67 session no later than Saturday, August 13, 1966, in order to participate in the pre-school orientation program. Payment of this fee qualifies the student applicant to be scheduled for testing and/or pre-registration, depending on whether or not he has taken the American College Test.

Payment of the **Matriculation** fee for a given semester entitles students to:

- (1) Attend, at no additional cost, athletic contests scheduled on the campus.
- (2) Receive the student newspaper, **Bulldog Barks**.
- (3) Attend scheduled Lyecum programs.
- (4) Use the Infirmary services for first aid and minor ills.
- (5) Use science laboratories and equipment in scheduled courses.
- (6) Receive private lessons in music if required in a curriculum and thereby the use of instruments and practice facilities when available. (Practice rooms to be used only by music students unless with special permission).
- (7) Receive the college yearbook, **Perkolator**, when matriculation fee is paid for both semesters of the regular school year.
- (8) Take part in other student activities supported in whole or in part from the fee.

ROOM RENT — Dormitory room rent is \$45.00 per semester; it is not refundable after the semester begins. All dormitory students must purchase meal tickets.

BOARD — Meals in the cafeteria are currently \$34.00 per month (84 meals; three meals a day, seven days a week, for four weeks), payable in advance each month (see College Calendar for due dates).

MAINTENANCE — A Maintenance fee is charged all regular students from Mississippi who do not reside in the four supporting counties of Harrison, Stone, Jackson, and George. This fee is \$10.00 per month (4 weeks) for students residing in a county providing tax support to a junior college. For those Mississippi students residing in counties that provide no tax support to a junior college, the fee is \$20.00 per month (4 weeks). This fee pays for lights, heat, water, and maintenance of that part of the plant used for non-boarding purposes. Students whose parents are not actual residents of the supporting counties must pay this fee monthly. This regulation is authorized by the Board of Trustees, is in accordance with state laws, and is strictly enforced.

NON-RESIDENT TUITION — A non-resident tuition charge of \$150.00 per semester is assessed all regular students whose parents or guardians are not legal residents of Mississippi. This tuition helps pay instructional, administrative, and other operational expenses. Non-resident tuition is due and payable at the beginning of each semester.

SPECIAL STUDENT TUITION — A fee of \$10.00 per semester is charged those students who take less than 12 semester hours credit (12 hours is the minimum load for a full-time student). If during the first six weeks term of the first semester a full-time student cuts his semester load down to less than twelve academic hours, he will be required to pay the special tuition fee of \$10.00 per semester hour in lieu of the regular matriculation fee. If such a student has been residing in a dormitory, he will also have to withdraw from the dormitory and continue as a day student.

EVENING-COLLEGE TUITION — The cost of courses offered in the evening-college division is \$10.00 per semester hour.

Miscellaneous Fees

MEDICAL INSURANCE — The college recommends that each student be covered by a hospitalization and medical insurance policy. The student may be a member of his family's plan or he may elect to enroll in a Student Health Program group plan made available through the college. Parents are reminded that most family plans terminate coverage of children at 18 years. Parents are also reminded that the college requires that parents or guardians of students sign a waiver which releases any official representative of the college from debts incurred when students require, in emergencies, the services of a doctor or a hospital.

NOTE: The college's group insurance plan is selected from those submitted by insurance companies each year. The college attempts to pick the plan which will give comprehensive coverage at minimum cost.

PHYSICAL EDUCATION GYM SUITS — All physical education students are required to wear gym suits in class. Appropriate suits are available at minimum cost through the college.

TRANSCRIPTS OF CREDIT — One official transcript of credit earned will be furnished to the student without charge. A fee of \$1.00 will be charged for each additional transcript.

GRADUATION FEES — Graduates will pay for caps and gowns and for diplomas. These fees are assessed during the semester in which the student is to graduate, and are dependent upon current price listings.

TESTING FEE — All entering students are required to take the American College Test. Students have the opportunity to take this test at any of three dates during their senior year in high school. If the test is not taken then, the student applicant must come to the campus on a scheduled testing date sometime during the summer prior to admission. The fee for taking the test during the summer is \$5.00.

LATE TESTING FEE — If a student cannot take the American College Test until registration begins on Tuesday, September 6, 1966, he will be charged a late testing fee of \$2.00 plus the normal fee of \$5.00.

LATE REGISTRATION FEE — Students who do not register for classes until after Wednesday, September 7, 1966, will be charged a late registration fee of \$4.00.

CHANGE OF PROGRAM FEE — After a student has been enrolled for one week, a fee of \$1.00 is charged for the addition of a new course, the exchange of one course for another, or for transferring from one section to another, unless the student is being requested to make such a change by the administration. The deadline for making any change is indicated in the College Calendar.

DORMITORY ROOM KEY DEPOSIT — Dormitory students are required to pay a fifty cent deposit for room keys. The deposit will be refunded when the student withdraws from the dormitory and returns the key.

DEFERRED EXAMINATION FEE — There is a charge of \$2.00 for deferred examination (See Examinations in Part IV . . ACADEMIC PROGRAM).

Refund Policy

The refund policy of the Mississippi Gulf Coast Junior College District is as follows:

MATRICULATION — No refund after August 13, 1966 for the first semester of 1966-67. For the second semester, matriculation is not refundable after classes begin.

ROOM RENT — No refund after the semester begins.

BOARD — The unused balance will be refunded.

OUT-OF-STATE TUITION — Will be refunded on a prorate basis.

NOTE: Tuition paid by special students attending under Armed Services assistance programs is not refundable, and a student is responsible for his full tuition charge up to the date of his withdrawal from any course or from the college.

SUMMARY OF EXPENSES

When it is convenient, students are encouraged to pay all expenses for a semester when that particular semester begins.

1. DAY STUDENTS

- (a) All commuting students whose parents reside in **Harrison, Stone, Jackson, or George** Counties will pay the following on enrolling for a semester:

Matriculation fee	\$50.00
Total due at registration	\$50.00

- (b) Commuting students from other, non-supporting Mississippi counties than those listed above will pay the same amount listed for (a) plus a **monthly** maintenance fee of
- | | |
|--|----------|
| plus a monthly maintenance fee of | \$10.00* |
| Total due at registration | \$60.00* |

*For each month after the first, student will pay \$10.00. This fee is \$10.00 per month for students residing in a county providing tax support to a junior college. For those students not residing in counties that provide tax support to a junior college, the fee is \$20.00 per month.

II. DORMITORY STUDENTS

ALL DORMITORY STUDENTS MUST PURCHASE MEAL TICKETS.

- (a) Dormitory students from **Harrison, Stone, Jackson, or George** counties will pay the following upon enrolling:

Matriculation fee	\$50.00
Room rent for semester	\$45.00
First month's meals	\$34.00
	\$129.00
Room key deposit	\$.50
Total due at registration	\$129.50

AFTER THE FIRST MONTH, expenses for meals will be \$34.00 per month payable each month, in advance.

- (b) Dormitory students coming from other non-supporting, Mississippi counties, than those listed above will pay the same amount listed

for (a) plus a monthly maintenance fee of	\$ 10.00
Total due at registration	\$139.50

AFTER THE FIRST MONTH, these students pay \$34.00 for meals and \$10.00 maintenance fee for a total each month of \$44.00.

- (c) OUT-OF-STATE STUDENTS pay the same as listed in (b) which refers to Mississippi students from non-supporting counties, BUT ALSO PAY an OUT-OF-STATE FEE OF \$150.00 each semester,

payable in advance	\$150.00
Total due at registration - Out-of-State	\$289.00

THE BOARD OF TRUSTEES OF THE MISSISSIPPI GULF COAST JUNIOR COLLEGE DISTRICT RESERVES THE RIGHT TO CHANGE ANY OR ALL FEES OR ANY COSTS PERTAINING TO EDUCATION, BOARD, HOUSING OR TRANSPORTATION WITHOUT NOTICE OR PUBLICATION IN ADVANCE OF SUCH CHANGES.

B. STUDENT AID: SCHOLARSHIPS AND STUDENT LABOR

The colleges use student labor for a number of functions such as bus driving, the library, clerical and secretarial help, cafeteria work, etc. While it attempts to provide work for every student who needs help in meeting college expenses, the college also insists that:

- (1) No student be permitted to have and hold a job who does not give it proper attention.
- (2) Students holding jobs must do satisfactory school work.
- (3) Students from Harrison, Stone, Jackson, and George counties be given preference.
- (4) Students be expected to keep jobs awarded them throughout the session and must not ask to be relieved from them without good cause.

The student work scholarships range from \$10.00 to \$60.00 a month.

Band and choir members may also be awarded scholarships in some instances; and a number of athletic scholarships are available to those who excel in sports.

Many organizations also sponsor scholarships. Examples are: The Pascagoula Kiwanis Club; the Wiggins Kiwanis Club; the Biloxi Pilot Club; the Wiggins, Biloxi, and Gulfport P.T.A.'s; the Susie Cooley Scholarships awarded by the local chapter of Phi Theta Kappa; the local chapter of Circle K; the Dantzler Lumber Company; the Crown-Zellerbach Corporation; the Gulfport Civitan Club; and the Mississippi Gulf Coast Junior College District Alumni Association.

The following scholarships are offered for students in the Registered Nursing Program:

1. Work scholarships, Singing River Hospital, Pascagoula, Mississippi. (Apply Director of Nursing Education.)
2. Becky Bacot Nursing Foundation, Singing River Hospital, Pascagoula, Mississippi. (Apply Director of Nursing Education.)

The Director of Student Services can supply the latest information on scholarships available for the 1966-67 session.

PART IV**A. GENERAL ACADEMIC REQUIREMENTS AND REGULATIONS**
ADMISSION REQUIREMENTS

In compliance with the Department of Health, Education, and Welfare Regulation under Title VI of the Civil Rights Act of 1964 the Mississippi Gulf Coast Junior College District gives assurance that no person in (the United States) shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity of the college.

Compliance number — 34-8130, 9 March, 1965.

Date 2 May, 1965.

Requirements for admission to the Mississippi Gulf Coast Junior College District may be met by any one of the following methods:

1. Graduation from an accredited high school with a minimum of fifteen units.
2. Passing the General Education Development Test (GED).

ENROLLMENT OF OUT-OF-STATE STUDENTS

Due to the tremendous increase in the number of out-of-state students who apply for admission to the Mississippi Gulf Coast Junior College District, the Admissions Committee has found it necessary to adopt several changes in its Admission Policies in regard to out-of-state students, effective for the 1963-64 term. They are as follows:

1. Only a limited number of students can be accepted because of the increasing demand from students of Harrison, Stone, Jackson, and George counties.
2. The Mississippi Gulf Coast Junior College District will not accept transfer students from an out-of-state college unless they are residents of Harrison, Stone, Jackson or George counties.
3. Out-of-state students who apply to the Mississippi Gulf Coast Junior College District must present a Standard Composite score of not less than 15 on the American College Test as well as an acceptable High School Transcript.
4. Students who are offered scholarships may have all of the above waived.
5. Because of the importance of Central and South America to the Gulf Coast Region, the Mississippi Gulf Coast Junior College District will continue to accept a limited number of out-of-country students from these areas who have sufficient knowledge of the English language to successfully engage in college studies. These students are not included in the number of out-of-state students that can be accepted.

ADMISSION POLICIES OF THE MISSISSIPPI GULF COAST JUNIOR COLLEGE DISTRICT

Experience of students in the Mississippi Gulf Coast Junior College District and in other colleges in Mississippi reveals that students who have a standard composite score of 15 or above on the American College Test have the best chance of success in a college transfer curriculum or a college technical curriculum. Experience also shows that those students who make between 11 and 14, inclusive, have a very poor chance of successfully doing a college curriculum. Likewise, those who make a score of 10, or below, have the least chance of success in college level curriculums.

Based upon the above facts the following admission policies have been established.

COLLEGE LEVEL COURSES

1. Applicants must be a high school graduate or equivalent (G.E.D.).
2. Must present a standard composite score of at least 11 on the A. C. T. Those scoring 11 - 14 inclusive will be admitted on probation for the first semester and will have to meet probationary standards as outlined in the policy of probation and suspension.

VOCATIONAL COURSES

1. All applicants under 18 years of age must be high school graduates. (To enroll in the Manpower Vocational Programs an applicant must be at least 18.)
2. Applicants must take vocational aptitude tests to determine admission to specific vocational programs. (No A. C. T. Score is required.)

STUDENT RECLASSIFICATION

Students in vocational programs will also be given the opportunity to participate in remedial general education courses. Any time that a student becomes proficient enough that he can meet regular college level admission requirements, he may be given consideration for reclassification.

ADMISSION PROCEDURE

1. Each prospective student must complete an application form, filling in the requested information in **ink** or by **typewriter**. The college calls attention, in particular, to four items relating to this application.
 - a. A small photograph **must** be attached to the form.
 - b. For students from Harrison, Stone, Jackson, and George Counties, recommendations for admission **must** be secured from five alumni.
 - c. A complete physical examination is required, including a blood serology. The smallpox vaccination **must** be within the last five years and the typhoid shots within the last two years, of the date of application.

- d. The application should be filed with the Director of Admissions, and a deposit of \$32.00 must be paid. This fee reserves a dormitory room for boarding students and enrollment space in classes for day students. "This deposit will apply toward payment of the \$50.00 matriculation fee which is due at registration. As Part III, FINANCIAL INFORMATION, makes clear, advance payment of the matriculation fee qualifies students for summer pre-registration orientation.

Unless the application is completed satisfactorily in all respects, it will be returned to the prospective student.

2. Each prospective student at the Mississippi Gulf Coast Junior College District must take the American College Test (ACT). This test is administered nationally four times a year, in November, February, April, and June; and applicants are encouraged to take the test at one of the nationally assigned dates and centers. Make-up test dates for prospective students who missed the national testing dates will be available during the summer at the three District campuses.

3. For those prospective students who meet admission requirements by method (1) above, i.e., graduation from an accredited high school, the transcript of the high school credits must be sent, immediately after graduation, to the campus Director of Admissions. Transfer students from other colleges must request that their college transcripts be mailed directly to the Director of Admissions of the center which they plan to attend.

4. Before they are officially accepted, all prospective students must have a personal interview with either the Dean or the Director of Admissions.

5. All new applicants must participate in one day of pre-registration orientation on the campus which they attend during the summer months. Prospective students will be notified what day they are scheduled to participate

6. Prospective students are not officially accepted until all these admission procedures are satisfactorily completed.

7. WHAT EACH BOARDING STUDENT SHOULD BRING:

Each student must bring or secure immediately upon arrival the following:

- | | |
|---|---|
| 1 Mattress cover
(may be purchased at Student
Personnel Office) | 2 Pairs window curtains
(2 yards finished) |
| 2 Pillow cases | 1 Drinking glass |
| 2 Bedspreads | Toilet articles |
| Evening dress for girls | 1 Laundry bag |
| 4 Sheets for single bed | Towels |
| 1 Pillow | Coat hangers |
| 2 Blankets | |

Students should bring electric table lamps from home.

IRREGULAR STUDENTS

A person over twenty-one years of age and of good moral character who cannot otherwise meet the Mississippi Gulf Coast Junior College District admission requirements but who desires special training in certain courses may be enrolled as an **IRREGULAR STUDENT**, if, in the opinion of the Dean of the College, he is able to keep up with the particular course work. Under no circumstances, however, are such **IRREGULAR STUDENTS** given college credit for the course they take.

REGULAR AND SPECIAL STUDENTS

All regular students are required to take at least twelve academic hours. Occasionally, conditions may arise making it advisable to permit a student to take less than twelve hours. Such a student shall be classified as a **SPECIAL STUDENT** and will be charged a tuition fee of \$10.00 per semester hour.

If a regular student should cut his academic load to less than twelve hours, he may attend there after **only as a day student**. If this should occur at any time during the first six weeks of the first semester, the student also would have to pay the irregular-student tuition fee of \$10.00 per semester hour in lieu of the matriculation fee.

A **normal** academic load consists of fifteen semester hours. Students may not take **more than eighteen hours** of academic work, without special permission from the Dean, except in agriculture and music.

POLICY OF PROBATION AND SUSPENSION

A full-time college student shall earn 12 academic semester hours and 24 quality points during a given semester or he shall be placed on probation for the next semester in which he enrolls. During the probationary semester the student must earn the required 12 academic hours and 24 quality points. If this requirement is not met, the student will be suspended for one semester unless he attends a summer session. In the case where it is possible for a student to immediately enroll for the summer session following his normal probationary period, summer credit earned may be applied to that credit earned during the probationary period in meeting the requirement of 12 academic hours and 24 quality points.

A student who has been suspended for one semester may apply for re-admission at the end of this period. If accepted by the admissions committee, he will be given one probationary semester. If the required 12 academic semester hours plus 24 quality points are not earned during this semester the student will be asked to withdraw and may not apply for re-admission for two regular semesters.

If a student is re-admitted for the third time and still fails to make the required 12 academic semester hours plus 24 quality points during this probationary semester he will be asked to withdraw and may not apply for re-admission at any future time.

WITHDRAWAL PROCEDURE

Once formally admitted, the student must complete the following withdrawal procedure to keep his record clear:

1. Obtain a withdrawal form from the Director of Student Personnel's Office.
2. Secure the specified signatures and return the form to the Business Office.

Any student who fails to follow the proper withdrawal procedure will not get credit for courses being taken, and his permanent record will be marked, "Withdrawn without permission or explanation," and will receive a failing grade of "F" in all courses.

GUIDANCE SERVICES

The fundamental objective of the guidance and counseling services of the Mississippi Gulf Coast Junior College District is to assist the student to achieve maximum results from his individual capabilities. This program includes the following:

1. **Pre-Registration Counseling:** For fall applicants the Mississippi Gulf Coast Junior College District requires an orientation interview with the Director of Admissions and Guidance. Prospective students in groups of approximately fifty make scheduled visits to the campus for at least one day during the summer. Those students who have not previously taken the American College Test will be given the test during this visit; and the interpreted results of the test will be shown. Applicants are individually interviewed by certified counselors and faculty advisors, who will help them prepare schedules for fall classes during the interview, the prospective students being assigned to class in certain courses according to the scores made on the American College Test.

Applicants for the spring semester follow a similar, though less intensified, pre-registration counseling program.

2. **Orientation Program:** At the opening of each session, brief orientation periods are held with all new students, at which time they are given a **Student Handbook** outlining specific college regulations and policy. In subsequent orientation periods, students are instructed in community living by dormitory supervisors, the Director of Student Services, and the Dean of Women. Representatives of the administration explain the college's responsibilities to the students, and the students' to the college. Presidents of the various student organizations explain the functions of their clubs and invite student participation.

3. **English Requirement:** During the pre-registration phase of the Orientation program, all freshmen will be required to take the ACT. Students will be assigned to English sections according to scores made on this test. However, at the end of the first semester in English 100, the student must demonstrate to the English faculty his level of efficiency, both in technical understanding and practical application. Failure in this attainment will necessitate the repetition of the course.

4. **Faculty Advisors:** Each student of the Mississippi Gulf Coast Junior College District is assigned to a member of the faculty who serves as the advisor for that student with respect to his academic program and progress.

5. **Personal Counseling:** Particular care and attention is given by the Director of Guidance and the Director of Student Services in counseling students on such matters as vocational choices, fields of study, or other college student problems.

6. **Faculty Counseling:** In addition to the above, each faculty member is available for consultation with any student at a mutually convenient time. Faculty members do not consider counseling to be an extra assignment, but one more opportunity to know and to help students.

CLASS ATTENDANCE

Students are expected to be prompt and regular in class attendance. Fundamentally, class attendance is the direct concern of the faculty member and his students. The faculty member has responsibility for judging the relationship between absences and the quality of performance of the student. Each student has the obligation to accept full responsibility for compliance with the spirit as well as the letter of attendance regulations.

Students are allowed one absence for each semester hour that a class meets. Each instructor reports daily all absences from class to the Director of Student Services where absences are recorded and excessive absences, as well as the penalties for such are noted in the student's personal records. If a student misses class more than the allowed absences, it becomes a matter for the instructor to decide whether or not to dismiss the student from the class.

If, in the judgment of the instructor, the student's excessive absences are unwarranted the instructor will send a drop slip to the Director of Student Services, and that student may no longer attend the class.

In any case, to obtain credit for a course, a student must attend a minimum two-thirds of the meetings of the class during the semester.

ASSEMBLY ATTENDANCE

Students are required to attend bi-monthly assembly programs. At these assemblies important announcements affecting the entire student body are made, and cultural programs are arranged to provide for the students' total educational enrichment.

GRADING SYSTEM

For the purpose of recording grades and reporting to parents, the college year is divided into two semesters, each being subdivided into two terms of nine weeks each. At the end of the first term of each semester, a preliminary estimate of progress is reported. This is NOT an official grade. Its purpose, is to give information on the **progress** of the student. A copy of this progress report will be mailed to the parent or guardian and a copy given to the student through his faculty advisor.

Official **grades** will be reported and recorded at the end of each semester. This grade is determined, in part, by an examination and also by the instructor's estimates on the following points: class attendance; quality of recitation; quality of completed assignments; promptness in completing work; persistence for mastery; self-reliance in work; application during study; attention to class activities; and general attitude in class.

All grades are reported according to the following letter scale:

A - Superior: Represents outstanding achievement in the regularly prescribed work.

B - Above Average: Represents above average achievement in the regularly prescribed work.

C - Average: Represents an average level of achievement.

D - Below Average: Lowest passing grade. Represents a below average achievement in the regularly prescribed work of the class.

F - Failure: Represents:

1. Failure to do the regularly prescribed work, or
2. Withdrawal from a course without permission, or
3. Withdrawal from a course - while failing - after the specified date listed in the College Calendar as the last allowable date for withdrawal.

I - Incomplete: A grade of "I" is given only when some phase of the prescribed work is not finished by the end of the semester. An "I" will become an "F" if the work is not completed during the student's next semester.

W - Withdrawn: The grade "W" is recorded if the student officially withdraws after the last day specified in the College Calendar and was not failing at the time of withdrawal. This grade is given to students who officially withdraw from school while passing and other exceptional cases.

EXAMINATIONS

Examinations given by the Mississippi Gulf Coast Junior College District are of four types: (1) Regular, (2) Deferred, (3) Special, (4) Entrance.

Regular examinations are given to classes in the normal course of a semester's work.

Deferred examinations are those given to students who for some good reason are unable to take the regular examinations. In all cases a student must secure written permission from the Registrar, and pay a fee of two dollars, before taking the deferred examination.

Special examinations are those given to students to remove conditional grades on subjects when the condition was caused by time lost due to illness or to some other emergency. Permission to take a special examination must be secured from a committee composed of the President, the Dean, and the instructor of the course. A fee of fifty cents is charged for each special examination.

Entrance examinations are of three types:

1. The American College Test is given to all students as a part of the admission procedure as noted previously.
2. Also as noted previously under admission requirements, an entrance examination may be given to those entering students who do qualify under the GED or accredited high school graduation categories.

QUALITY POINTS

To qualify for graduation, a student must earn a minimum of two quality points for each academic hour. Quality points are computed on the following basis:

A	4 quality points
B	3 quality points
C	2 quality points
D	1 quality point
F	no quality points

Any course in which a student fails to make quality points may be repeated, and quality points earned on the basis of his second grade.

The grades which a student transfers to the Mississippi Gulf Coast Junior College District will be the basis for determining quality points according to the above scale.

HONORS

A student who has earned a quality point average of 3.3 shall be graduated "With Honors." A student who has earned a quality point average of 3.7 shall be graduated "With Special Honors."

HONOR ROLL

At the end of each term and at the close of every semester a President's list and a Dean's list will be published. A commendatory personal letter from the President of the District will be given to students named to the President's list and a commendatory form letter from the Dean of the College will be given to students named to the Dean's list.

To be eligible for the President's list, a student must maintain an "A" average on 15 semester hours of academic work.

To be eligible for the Dean's list, a student must maintain a "B" average on 15 semester hours of academic work.

AWARDS AND MEDALS

The **Huff Medal** and the **Denson Medal** will be awarded deserving students in speech.

The **Smith Medal** is presented to the best all-around girl athlete, and the **Bennett Medal** to the best all-around boy athlete.

The **May Medal** is given to the piano student - not a music major - demonstrating the greatest progress and effort. The **Darby Medal** is given to the music - major piano student demonstrating the greatest progress and effort.

The **Forbis Medal** is awarded the male student who performs most satisfactorily the work assigned for self-support; and the **Heidelberg Medal** is awarded the girl student who performs most satisfactorily the work assigned her for self-support.

The **Colmer Medal** is presented to the student majoring in agriculture who has the highest scholastic average. The **Woolworth Medal** in agriculture is presented to the student who has attained most in a practical way from laboratory and field practice work.

The **Gregory Medal** is given to the student making most progress in Mathematics.

Special awards will be made to students who are most proficient in first year Spanish and first year French.

The **A. J. Price Memorial Medal** is presented to the student who has throughout the year practiced most effectively the Golden Rule.

The **C. S. Wentzell Memorial Football Trophy** is given to the sophomore who has contributed most to developing good sportsmanship, student attitude, and team effectiveness.

who has best promoted athletics by exemplary conduct.

The **Doctor D. L. Hollis Athletic Trophy** is awarded the sophomore

REQUIREMENTS FOR GRADUATION

The Mississippi Gulf Coast Junior College District graduates students who have successfully completed all requirements for the Associate of Arts Degree, The Associate of Science Degree, or the Diploma. To graduate under **one** of the **first two** mentioned plans, students must take subjects as listed in the catalog under the program selected as a **MAJOR COURSE OF STUDY**. Campus Deans may make some exceptions to the prescribed curriculum if students plan in advance with them concerning **SPECIFIC CURRICULUM REQUIREMENTS** as outlined in Senior College or University catalogs or if in the judgment of the Deans a substitution of subject is absolutely necessary. All graduates will also meet successfully **GENERAL REQUIREMENTS FOR GRADUATION**. The plans of graduation are as follows:

ASSOCIATE OF ARTS Degree: For specific requirements see "Suggested Programs of Study", Group I and V, in Part IV-B.

ASSOCIATE OF SCIENCE Degree: For specific subject requirements see "Suggested Programs of Study", Groups II, III, IV, VI, VII, VIII, IX, and X, in Part IV-B.

DIPLOMA: Earn sixty semester hours, which must include English Composition 100 and 101.

GENERAL GRADUATION REQUIREMENTS

In addition to meeting the specific requirements as outlined above, students must fulfill the following general requirements for graduation - under **ANY OF THE PLANS OF GRADUATION OF THE MISSISSIPPI GULF COAST JUNIOR COLLEGE DISTRICT**:

Earn at least sixty academic semester hours with a quality point average of at least 2.0 on **ALL ACADEMIC HOURS ATTEMPTED**. (The highest grade will be counted if a subject is repeated and hours will only be counted once in the total of attempted hours).

Earn four semester hours of physical education. Under certain conditions academic hours may be substituted with approval of the Dean but this approval must be granted in advance and the student must sign a substitution of course form.

CERTIFICATES OF COMPLETION

TERMINAL STUDENTS in both Academic programs of less than two years and in **VOCATIONAL** programs which are not followed for college academic credit, will be awarded **SPECIFIC CERTIFICATES FOR THEIR PROGRAMS** upon successful completion.

NUMBERING OF COURSES

All courses offered at the Mississippi Gulf Coast Junior College District are identified by name and number. Courses numbered from 100 to 199 are considered to be freshman courses; those numbered 200 to 299 are considered to be sophomore courses. Students should choose courses in accordance with their class standing. Students with less than twenty-four semester hours are considered to be freshman; those with twenty-four or more academic hours and forty-eight quality points are considered to be sophomores.

Course numbers which are followed by "T" are technical courses and offered for college credit only to those students enrolled in the area of technology.

B. SUGGESTED PROGRAMS OF STUDY

As the earlier section on Guidance and Counseling emphasized, the student's choice of courses and course sequences depends largely on the student's choice of a career. The Director of Admissions and Guidance, and the student's assigned faculty advisor, are available to help in counseling; but it is, of course, the student's personal and final responsibility to choose his own course of study.

The course groupings and sequences which follow are those which the faculty counselors normally recommend - - the career objective of each group of courses being indicated ahead of the recommended sequence listings. These recommended course groupings and sequences will meet not only the Mississippi Gulf Coast Junior College District's own requirements for graduation degrees or certificates but also most, if not all, normal transfer prerequisites.

Prospective students, therefore, should review this entire section on "Suggested Programs of Study" before selecting the group classification which seems best to fit their particular needs.

Obviously, some career choices will require more years of college-level work than the Mississippi Gulf Coast Junior College District currently offers. The Mississippi Gulf Coast Junior College District has designed its own basic courses and course sequences so that earned credits can be transferred readily to other accredited institutions. However, it should be clearly understood that individual senior colleges and professional schools may have individual freshman and sophomore requirements; and students contemplating transfer should consult the latest catalog of the institution to which they are planning to transfer - - before they complete their registration. If the senior institution requires an arrangement of courses different from any recommended in this section, the student may schedule an arrangement of courses to fit the particular case.

NOTE: Subsequent transfer from one group classification to another may make it difficult to meet graduation requirements in the normal period of time.

GROUP I**CORE CURRICULUM**

This group is designed for students who are planning to complete requirements for a B.A. Degree; or to study law, journalism or languages; or who are as yet undecided on their future career.

Those students in this group should consult their faculty advisor to adjust the courses pursued in order to meet the special curriculum needs of the individual.

GROUP II**AGRICULTURE**

(Perkinston Only)

Students wishing to major in general agriculture, agronomy, animal husbandry, dairying, horticulture, or poultry husbandry should pursue the basic agricultural curriculum outlined below.

Those wishing to specialize in agricultural education, agricultural administration, agricultural economics, forestry, agricultural engineering, or veterinary science should pursue the curriculum specific to their specialty.

GROUP III**BUSINESS AND OFFICE ADMINISTRATION**

The Business and Office Administration curriculum group is designed to give nine-month, twelve-month, and two-year terminal programs in Secretarial Science; and one-year and two-year terminal programs in General Business and Accounting. It is also designed to give two-year terminal programs in Medical Secretarial Training and Business Data Processing Technology.

For non-terminal students who plan to secure a degree in Business at a senior institution, the Junior College District Bachelor of Science Degree preparatory curriculum will prepare business majors in such fields as: Accounting and Auditing; Business Administration; Economics; Marketing; Office Management; Personnel Management; Institutional and Industrial Management, Hospital Management; Hotel Management; Banking; Life Insurance; Property and Casualty Insurance; or Public Administration.

Finally, the Junior College District Business Education curriculum offers the freshman and sophomore courses normally required by a senior institution for the Bachelor's Degree in Business Education.

Physics 203	4	History 201	3
Mathematics 202	3	Elective	6
History 102	3	Physical Education	1
Physical Education	1		

NOTE 1: The elective choice may be Economics 209, Sociology 202, Psychology 200, or English 203. Students majoring in petroleum engineering, however, should take Chemistry 201 as an elective.

NOTE 2: Students transferring to the School of Engineering at Mississippi State University must enter in the summer session following their sophomore year in order to take the professional engineering courses required for junior standing. If this is done, transferring students can graduate in two additional years.

GROUP VII**SCIENCE**

The basic science course outlined below is recommended for four-year science majors, for pre-medical, and pre-dental students.

The recommended courses for medical technologist, optometrists, and physical therapists and pre-pharmacy are listed following the basic science course.

GROUP VIII

EDUCATION

Requirements for teaching are set by State Certification rulings, and are the same throughout Mississippi. Since December, 1956, all beginning teachers in accredited schools must be college graduates. The curriculum given below is the recommended program of general and basic professional education for the first two years of the four years required for an "A" certificate. It will be noted that courses recommended for the sophomore year differ for elementary and secondary education majors.

Freshman Year

1st. Semester	Hrs.	2nd Semester	Hrs.
English 100	3	English 101	3
History 102	3	History 103	3
Biology 100	4	Biology 101	4
Health 104	3	*Mathematics 100 or 102	3
Education 100	3	Government 100	3

GROUP IX**NURSING**

The associate degree nursing program is designed to fulfill the education needs of qualified high school graduates both men and women who (1) want to prepare for professional nursing in a relatively short time and (2) wish to study to a college setting where they can share the same responsibilities and privileges as other college students.

The program consists of two academic years and one six weeks summer session. Each beginning class enters in September.

Students of nursing meet the requirements of the college and the nursing program for admission, promotion and graduation. College credit is given for all courses.

Hospitals used for nursing practice and clinical experience are the Gulfport Memorial Hospital, Gulfport, and the Singing River Hospital, Pascagoula. Clinical experiences in the hospitals are planned as a part of the college courses in nursing. These experiences are under the direction of the college instructors of nursing and are selected to correlate nursing practice with current lectures in nursing

Graduates of the program are eligible to take the Mississippi State Board Examinations for license to become a registered nurse (R.N.).

Students are admitted on a selective basis. All applicants must have completed their A.C.T., nursing aptitude tests, physical and dental examinations, and have ordered their uniforms by July 1, 1966.

Pre-registration is required.

The curriculum as given below is the present method of organization.

A student completes the program with a total of 66 academic hours. These hours are about equally divided between general education and courses in nursing.

General education courses completed in other colleges will be accepted only if they are parallel to courses required in this college.

GROUP X
TECHNOLOGY
DRAFTING AND DESIGN

Two-Year Terminal

This program is open to those seeking an opportunity to enter the rapidly expanding field of drafting and design.

Drafting, one of the engineer's most important forms of communication, is the skill which translates engineering ideas into lines and deminsions on paper which are used by the tradesman or craftsman in making an idea a reality. This translation is usually made by men and women called draftsmen and not engineers.

Training, practice, patience, and attention to detail, the ingredients which develop skill and knowledge in drafting and design technology, are outstanding characteristics of the curriculum.

Each year, drafting departments of large industries offer excellent salaries, outstanding company benefits, and opportunities for advancement to graduates of this program.

This curriculum grants an Associate of Science degree but is not designed for transfer credit to a senior college.

ELECTRONICS**(Jackson County College)****Two-Year Terminal**

The technical electronics program is composed of college level courses and curriculum of an applied science nature.

The technician's duties involve much of the knowledge and skills of both the professional engineer and the skilled craftsman. He is required to know basic theories, and how they may be applied to solve the complex problems of modern industry.

Upon graduation the student is prepared to accept positions as electronic technicians in installation, maintenance, testing, sales, and related activities.

This curriculum grants an Associate of Science degree but is not designed for transfer credit to a senior college.

AUTOMOTIVE SERVICE AND MANAGEMENT**(Perkinston College)****Two-Year Terminal**

This curriculum is designed to enable students to enter the automotive industry as beginning workers. This program of instruction should enable the graduate to advance from this entry level to supervisory and managerial positions after obtaining experience on the job.

Due to the increasing complexity of the automotive repair and service industry, there is an increasing demand for greater personnel competence and organizational and managerial planning.

This curriculum grants an Associate of Science Degree, but is not designed for transfer credit to a senior college.

VOCATIONAL EDUCATION**REFRIGERATION AND AIR CONDITIONING****(Jefferson Davis Junior College)****Nine Months**

This curriculum is designed to give the fundamentals of air conditioning and refrigeration with a working knowledge of all phases of this field. It is designed to enable students to successfully enter and progress in the field of air conditioning and refrigeration installation, service, and repair. The study of related basic theory and scientific principles is coupled with practical application and experience in varied laboratory experience. This program is nine months in length, students attending class five hours per day, five days per week.

Major Units of Instruction**First Semester**

- I. Introduction to Refrigeration
 - A. Refrigeration Systems, Cycles, and Classification
 - B. Heat Flow
- II. Tools and Equipment
- III. Heat and Temperature
 - A. The effect of heat energy in refrigeration
 - B. Temperature measurement, indicators, controls, and recorders.
- IV. Refrigeration control valves and cap tubes
- V. Motor Controls
- VI. Basic Electricity and Motors

Second Semester

- I. Servicing refrigeration equipment
- II. Trouble shooting refrigeration equipment
- III. Commercial Refrigeration

PRACTICAL NURSING**(Jefferson Davis and Jackson County Junior Colleges)****(Twelve Months)**

This program is designed to train persons to become Licensed Practical Nurses. Students are enrolled four months in fundamentals which is primarily classroom and laboratory work. Students then spend eight months in a hospital under the supervision of qualified instructor nurses. Upon successful completion of this course, students are eligible to write the State Board Examination to become Licensed Practical Nurses. Application for this program should be made directly to your local employment office.

Topical Outline of Major Units

- AREA I: FOUNDATION - Four (4) Months**
Orientation
Health: Individual, Family, Community
Normal Body Structure and Function
Normal Nutrition
Human Development
Introduction to Nursing the Patient
Introduction to Illness
- AREA II: CLINICAL - Eight (8) Months**
Vocational Relationships
Medical-Surgical Nursing - Meeting Nursing Needs
Children
Adults
Aged and Chronically Ill
Mothers and Newborns - Meeting Nursing Needs
- SPECIAL AREAS:**
Central Supply Room
Emergency Room
Other

INDUSTRIAL ELECTRICITY**(Jefferson Davis Junior College)****Nine Months**

This course is designed to train an individual to be an asset to the community in that he will have gained the necessary knowledge of the fundamentals of electricity and the practical applications of this theory to actual and authentic situations. He will have the essential groundwork that is necessary to learn the many and various aspects concerned with electrical trades such as operation, maintenance, troubleshooting, repair and installation of both simple and complicated items that make up electrical machinery, instruments and systems.

Major Units of Instruction

First Semester		Hours
I.	Orientation	
II.	Introduction	6
III.	Basic Mathematics	140
	A. Arithmetic Review	
	B. Equations	
	C. Angular Theory	
	D. Periodic Functions	
	E. Logarithms	
IV.	Electricity Fundamentals	394
	A. Molecular Theory	
	B. Electrical Phenomena	
	C. Battery Electromotive Force	
	D. Basic Circuitry	
	E. Detailed Circuitry	
	F. Magnetism and Electromagnetism	
	G. Electrostatics and Capacitance	
	H. DC Generators	
	I. DC Motors	
Second Semester		
V.	Alternating Current and Voltage	200
	A. AC Circuit Analysis	
	B. Polyphase Systems	
	C. AC Instruments and Measurements	
	D. Synchronous Generators	
	E. Transformers	
	F. Polyphase Induction Motors	
	G. Single Phase Motors	
	H. Synchronous Motors and Converters	
	I. Transmission and Distribution of Electrical Power	
	J. Electronics and Electronics Devices	
	K. Solid State Devices (Transistors)	
VI.	Auxiliary Equipment	75
	A. Speed Regulators and Governors	
	B. Voltage Regulators	
	C. Motor Control Circuits	
	D. Synchronisers	
VII.	Wiring Systems	125
	A. Residential	
	B. Commercial	
	C. Industrial	

TRADE EXTENSION CLASSES

The Mississippi Gulf Coast Junior College District is continually striving to meet the training needs of this area. One phase of vocational and technical education is trade extension classes which are designed to assist employed persons in keeping abreast of new developments in their vocation and to provide an opportunity for advancement. This junior college district has, therefore, attempted to offer short-term specialized classes as a need for them is identified. Courses of this nature are non-credit and may be developed upon request of interested persons providing sufficient enrollment makes such a class feasible. Contact the Dean of any of the three district colleges for further details.

**C. ALPHABETICAL LISTING AND DESCRIPTION
OF NUMBERED COURSES**

NOTE: Numbers in parentheses following course title indicate course numbers in previous catalogs.

ART

Mr. Mathis

Miss McInnis

NOTE: The Art Department reserves the privilege to retain student work for exhibition purposes.

- ART101 — Introductory Art** Three Semester Hours
The course is designed for prospective elementary teaching programs. It offers the fundamentals of drawing, color theory, fundamentals of lettering; and problems in use of various media suitable for elementary schools.
- ART102 — Drawing I** Three Semester Hours
Basic problems in drawing, composition and some figure drawing with the use of charcoal and pencil.
Two lecture and four laboratory periods per week.
- ART103 — Drawing II** Three Semester Hours
This is a continuation of Drawing I with the additional use of such media as pen and ink, wash and conte crayon.
Two lecture and four laboratory periods per week.
- ART104 — Design I** Three Semester Hours
Study in terms of visual design, problems involving all the design elements of color, line, light, shade, etc. Color theory, some lettering, variety of media and techniques with two dimensional design.
Two lecture and four laboratory periods per week.
- ART105 — Art Appreciation** Three Semester Hours
An introduction providing a background for the study and appreciation of art. An approach to the understanding and enjoyment of plastic arts.
- ART000 — Drawing, Design and Color for Adults** Non-Credit
One three hour studio period weekly.

- ART202 — Drawing III** Three Semester Hours
 Prerequisite: Drawing I and II or permission of instructor.
 Fluid media techniques: Felt nibs, pencil and ink; wash.
 Emphasis on interpretation and composition.
 Two lecture and four laboratory periods per week.
- ART203 — Drawing IV** Three Semester Hours
 Prerequisite: Art 202 or permission of the instructor. Fluid media techniques: wash drawing. Interpretation and composition emphasized.
 Two lecture and four laboratory periods per week.
- ART204 — Design II** Three Semester Hours
 Prerequisite: Art 104 or permission of instructor. Further study of the creative approach to design through the use of reproductive media and techniques with an emphasis on three dimensional design.
 Two lecture and four laboratory periods per week.
- ART205 — Ceramics** Three Semester Hours
 The use of ceramic materials as a means of expression. Experiences in handforming, application of glazes and firing.
 Six hours laboratory per week.
- ART206 — Sculpture** Three Semester Hours
 Prerequisite: Art 205 or permission of the instructor. Problems in ceramic sculpture. Study of glaze mixing and application.
 Six hours laboratory per week.
- ART207 — Art History I** Three Semester Hours
 Survey of Art History from Pre-historic art through the Renaissance.
- ART208 — Art History II** Three Semester Hours
 Survey of Art History from Baroque Art through Modern Art.

AGRICULTURE

Mr. Shill

- AGR100 — General Horticulture** Three Semester Hours
 Fundamentals of plant growth are applied to horticultural crops.
 Two lecture and two laboratory periods per week.
- AGR101 — Farm Crops** Three Semester Hours
 A study of the varieties, methods of planting, cultivating and harvesting common field and forage crops is made.
 Two lecture and two laboratory periods per week.
- AGR102 — Poultry Husbandry** Three Semester Hours
 A study is made of the fundamental principles of poultry husbandry.
 Two lecture and two laboratory periods per week.
- AGR103 — Elements of Animal Husbandry** Three Semester Hours
 This survey in the field of animal husbandry deals with the relationship of livestock to farming; including a study of breeds and market classes as well as grades of farm animals.
 Two lecture and two laboratory periods per week.
- AGR200 — Principles of Dairying** Three Semester Hours
 A general survey is made of breeds, selection, feeding and management of dairy cattle.
 Two lecture and two laboratory periods per week.

AGR201 — Soils

Four Semester Hours

This is a study of the physical, chemical and biological nature of soils, the fundamentals of soil classification and the relationship between soils and growing plants.

Prerequisite: Chemistry 104

Three lecture and two laboratory periods per week.

AGR202 — Farm Forestry

Three Semester Hours

This course deals with practical development and management of farm forests.

Two lecture and three laboratory periods per week.

AGR203 — Principles of Livestock Feeding

Three Semester Hours

This course presents the principles of feeding farm animals as well as the composition and nutritive value of feeds and the compilation of rations.

Prerequisite: Elements of Animal Husbandry 103.

Two lecture and two laboratory periods per week.

BUSINESS AND OFFICE ADMINISTRATION

Mr. Endris	Mrs. Miller	Miss Dukes	Mr. Rouse	Mrs. Lee
Miss E. Graves	Mrs. McInnis	Mr. Malone	Mrs. Thomas	
	Mr. Thornton	Mr. Smith		

COM100-101 — Elementary Shorthand

Three Semester Hours Each

This course includes a study of Gregg Shorthand simplified, theory, phrasing, brief forms, transcripts, letter placement, and dictation of articles and various letters. Elementary shorthand is divided into two groups: (A) for those students having had shorthand in high school for one year or more. (B) for those students having no previous shorthand, or less than one year of shorthand in high school.

COM104 — Elementary Typewriting

Three Semester Hours

This course is designed for beginners in typewriting. Credit will not be given to a student whose high school transcript shows one unit in typewriting except through permission from the instructor.

COM105 — Intermediate Typewriting

Three Semester Hours

This course includes a review of basic technique and continues with such elements as business letters with special parts, tabulation problems, manuscripts, and interoffice correspondence.

COM107 — Introduction to Business

Three Semester Hours

This course is designed to provide the student with a general background of the nature of business and a preliminary idea of the various areas of business specialization.

BLA211 — Business Law

Three Semester Hours

This course is designed to acquaint the students with the fundamental principles of law as they relate to the basic legal problems of business transactions in our economy. Special attention will be given to: an introduction to law; law of contracts; agencies and employment; negotiable instruments and commercial paper.

COM216 — Business Writing

Three Semester Hours

This course emphasizes the principles of effective report and letter writing with practice in the preparation of business letters such as sales, credit, collection, promotion, and application.

Prerequisite: Typewriting

IBM119-T — Basic Computing Machines

Three Semester Hours

The Basic Computing course is not an introduction to any specific machine, but rather it is a course intended to provide a foundation for future detailed study of specific systems. This course will illustrate the development of a data processing system from the key punch to the accounting machine.

Two lecture and two laboratory periods per week.

IBM120-T — Basic Computing Machines

Three Semester Hours

This course will develop the processable solutions to such factors as additions, subtraction, detail printing, group printing, and elimination on the 402 Accounting machine. Laboratory exercises will be executed involving planning and wiring a range of IBM equipment.

Two lecture and two laboratory periods per week.

COM200-201 — Advanced Shorthand

Three Semester Hours Each

This course offers training in the theory of advanced shorthand. Dictation is given from new material at varying rates of speed with emphasis placed upon phrasing, accurate and attractive transcripts, and punctuation of business letters.

COM202 — Medical Shorthand and Terminology

Three Semester Hours

This course offers specialized training in medical shorthand theory, dictation, and transcription. It also includes medical terms, their pronunciation, spelling, and definitions.

COM203 — Advanced Typewriting

Three Semester Hours

Special communication forms, all letter styles, statistical reports, business forms, and legal reports are included in this course. Speed, control, and production are re-emphasized.

Prerequisite: Typewriting 105

COM204 — Problems in Typewriting

Three Semester Hours

This course includes a review of techniques in skill building with development of speed and accuracy in typing a variety of office forms, and emphasis on short-cuts in production typewriting.

Prerequisite: Typewriting 203.

COM205 — Secretarial Procedures

Three Semester Hours

The purpose of this course is to give the student training in general office practice and procedure.

COM206 — Office Machines

Three Semester Hours

This course is designed to give a reasonable proficiency in the use of such machines as calculators, adding machines, transcribing machines, duplicating machines and other types of office appliances.

Prerequisite: Typewriting.

ACC207-208 — Principles of Accounting

Four Semester Hours Each

This course is designed to give students an understanding of recording, classification and summarization of business transactions and events with insight into interpretation of the resulting effects upon the business. Previous knowledge of bookkeeping or accounting is not required.

ECO209 — Principles of Economics

Three Semester Hours

This course is an analysis of the basic economic principles and problems that we are concerned with in our American capitalistic economic system. It is an introduction to micro-economics with reference to production, distribution, exchange, and consumption with the study of the Federal Reserve System, employment, taxation, and national income analysis, and the rudiments of supply and demand as they operate in our political economy.

ECO210 — Principles of Economics

Three Semester Hours

This course is a continuation of Economics 209 with special emphasis in micro-economics and further emphasis on principles of economics in the study of the factors of production; land, labor, capital, and management and their returns; rent, wages, interest, and profit. Also included are the determination of values and prices, along with supply and demand, under pure competition, monopoly, and monopolistic competition, and an introduction of international trade and finance, economic growth, and the price level.

IBM213-T — Data Processing Applications

Three Semester Hours

This course is designed to acquaint the student with data processing applications of Accounts Receivable, Accounts Payable, Payroll, and Inventory. In addition to practical and typical equipment utilization, the student will gain an understanding of how machines and systems are combined and the advantages to be realized by a company through mechanization. Two lecture and two laboratory periods per week.

IBM214-T — Systems Development and Design

Three Semester Hours

The objective of this course is to provide the student with a knowledge of programming systems concept so that he can initiate a workable accounting system for a particular business.

Two lecture and two laboratory periods per week.

IBM215-T — Introduction to Programming Concepts and the Computer

Five Semester Hours

The student will engage in discussions of the functions and capabilities of the 1130 Computer. Programming drills, exercises, and case studies will be presented with a portion of the tools and raw materials necessary for becoming a programmer.

Three lecture and four laboratory periods per week.

COMMUNICATIONS AND LITERATURE

Miss Alexander	Mr. Burnham	Mr. Douglas	Mrs. Eason
Mrs. Malone	Mr. Goforth	Mrs. Lane	Mrs. L. Hayden
Mrs. Stroud	Mr. Johansson	Mrs. Lott	Mr. Lott
Mr. Lisotta			

ENG000 — Grammar - Writing Laboratory

Non-Credit

The purpose of this course is to provide a concentrated review of grammar and to offer the student practice in composition writing; it is designed for students whose entrance scores indicate the need for special attention.

ENG100-101 — English Composition

Three Semester Hours

This course, a basic requirement in any college curriculum, draws upon the areas of reading, writing, speaking and listening, vocabulary building, elementary research and critical analysis. Since it is planned to meet the needs of the entering student, the depth and scope of the two-level program is designated by the A and B divisions . . . advancing the student adequately prepared in grammar and rhetoric, and assisting the student noticeably deficient in these principles.

ENG102 — Oral Communication (12)

Three Semester Hours

The basic principles of effective speech preparation and delivery are emphasized, and the student applies these techniques in practical speaking experiences. Speeches to inform and instruct, to convince and persuade, to stimulate and entertain, and speeches for special occasions are a part of the course.

Parliamentary law is also included.

ENG103 — Oral Interpretation

Three Semester Hours

The mechanics of the interpretation of prose and poetry selections are applied in the presentation of selections for criticism given by the students. Sometimes called Oral Reading, this knowledge of interpretation will increase the reader's appreciation of all types of literature. This course is recommended for English majors, Education majors, Ministerial students and Pre-law students.

Prerequisite: Public Speaking 102

ENG104 — Development Reading - Improvement of Study Two Semester Hours

This course is designed to aid students improve their reading skills in both speed and comprehension and develop study skills geared to college level work, including spelling, note-taking, and worthwhile use of time. Three periods weekly.

JOU105-106 — Journalism

Three Semester Hours

This is a course in newspaper reporting, news-editing and layout, headline writing, proof reading, and general news regulations. These techniques are applied in the publication of the college newspaper **The Bulldog Barks**. Special attention is given to news stories, feature stories, interviews, and editorials.

ENG107 — Play Production

Two Semester Hours

This course covers the theories and techniques of acting including: character development, stage movement and stage business as well as script analysis.

ENG108 — Play Production

Two Semester Hours

This is a study of the problems in directing including: casting, rehearsing, scene designing, costuming, make-up, stage craft and organization.

ENG109 — Debate

Three Semester Hours

This course offers the basic principles in debate and argumentative speaking, with practical application of these principles in both areas.

ENG110 — Parliamentary Procedure

One Semester Hour

The purpose of this course is to study parliamentary law, and to apply its principles.

REL113 — A Survey of the Old Testament

Three Semester Hours

This course is designed to give the student a basic foundation in the study of the Old Testament. Attention will be given to the historical setting of each book with emphasis on Hebrew custom and ritual. Some time will be spent teaching the importance of the Old Testament in an understanding of the New Testament and fundamental principles of interpretation.

REL114 — A Survey of the New Testament

Three Semester Hours

This study is for the purpose of giving the student a working knowledge and appreciation of the New Testament. It is basically a lecture course using the Bible as the text. Some attention will be given to the writing, preservation, and translation of the Scripture; the historical and geographical setting of each book; and the development of the Christian movement in the First Century.

ENG200-201 — Survey of English Literature Three Semester Hours Each
This study involves a comprehensive treatment of leading authors, important works and chief literary types. The work is pursued chronologically, beginning the first semester with the Old English Period and extending into Neo-Classical Age. The second semester continues with the Romantic Period, and ends with the contemporary scene.

ENG202 — An Introduction to World Literature Three Semester Hours
The course includes selections from fiction, non-fictional prose, poetry, and drama with emphasis on British and American Literature.

ENG203 — American Literature, A Survey Three Semester Hours
The course is a survey of American literature from colonial times to the present, designed to develop an appreciation of our American heritage.

REL204 — The Life of Christ Three Semester Hours
This course is a complete study of the life of Christ as recorded in the Four Gospels (Matthew, Mark, Luke, and John), which will include a background study of the geographical, political and social conditions of the world in Christ's day, His birth, His ministry, His teachings, His disciples, His death and resurrection, and influence upon the world.

REL205 — Life and Letters of Paul Three Semester Hours
This course deals in detail with the life of the Apostle Paul as recorded in the book of Acts and with each of the Epistles which he wrote. Major attention will be given to Paul's three Missionary journeys.

EDUCATION AND PSYCHOLOGY

Mr. Dayton

Mr. Shows

Mr Douglas

EDU100 — Introduction to Education Three Semester Hours
The purpose of this course is to give the student a view of the entire field of education, which will serve as a background for more specialized courses.

EDU102 — The Modern Elementary School Three Semester Hours
Emphasis is placed in this course on the philosophy, objectives, organization and administration of the modern elementary school. Consideration is given to the history of elementary education, curriculum and teacher personality. Observation is provided in surrounding elementary schools.

PSY200 — General Psychology Three Semester Hours
This course is designed to give the student a broad understanding of man's development from birth. A study of the motivating factors of human behavior is emphasized.

PSY201 — Child Growth and Development Three Semester Hours
This is a study of the development of the child from the prenatal period through adolescence, including the physical, mental and social characteristics of the pre-school child, and the major problems in the child development.

Prerequisite: Psychology 200.

FOREIGN LANGUAGES

Mrs. Guild

Mrs. Ellis

NOTE: Students must complete a minimum of one year of work in a foreign language if the credit is to be counted toward graduation. All students of French and Spanish are required to schedule two periods per week in the laboratory. Students who have two years of high school credit in French or Spanish must elect French 200 or Spanish 200 instead of beginning courses. ...

NOTE: Descriptions which follow are for Perkinston only.

FRE100 — French Four Semester Hours
An oral-aural approach stressing conversation, pronunciation, comprehension, reading, writing and functional grammar, with emphasis on the practical aspects of the language. A modern language laboratory is used extensively.

FRE101 — French Four Semester Hours
Continuation of 100.
Five lecture and two language laboratory hours.

FRE200 — French Four Semester Hours
Continuation of 101.
Five lecture and two language laboratory hours.

FRE201 — French Four Semester Hours
Continuation of 200 with additional literary and cultural readings and compositions. Review of essential elements of grammar.
Five lecture and two language laboratory hours.

SPA100 — Spanish Four Semester Hours
An oral-aural approach stressing conversation, pronunciation, comprehension, reading and functional grammar, with emphasis on the practical aspects of the language. A modern language laboratory is used extensively.
Five lecture and two language laboratory hours.

SPA101 — Spanish Four Semester Hours
Continuation of 100.
Five lecture and two language laboratory hours.

SPA200 — Spanish Four Semester Hours
Continuation of 101.
Five lecture and two language laboratory hours.

SPA201 — Spanish Four Semester Hours
Continuation of 200 with additional literary and cultural readings and compositions. Review of essential elements of grammar.
Five lecture and two language laboratory hours.

NOTE: Descriptions which follow are for Jackson County and Jefferson Davis.

FRE100-101 — First Year French Three Semester Hours Each
This course is designed for beginners or for those whose preparation is one year or less in high school French. Drills in oral and written French through conversation and dictation are stressed.
Three lecture and two laboratory hours.

FRE200-201 — Second Year French Three Semester Hours Each
This course includes a continuation of oral and written French composition, dictation, and conversation. Supplementary readings are required.

Prerequisite: One year of college French or two years of high school French.

Three lecture and two laboratory hours.

SPA102-103 — First Year Spanish Three Semester Hours Each
This course is designed for beginners or for those whose preparation is one year or less in high school Spanish. Drills in oral and written Spanish through conversation and dictation are stressed.
Three lecture and two laboratory hours.

SPA202-203 — Second Year Spanish Three Semester Hours Each
This includes a continuation of oral and written Spanish composition, dictation and conversation. Supplementary readings are required.

Prerequisite: One year of college Spanish or two years of high school Spanish.

Three lecture and two laboratory hours.

HEALTH AND PHYSICAL EDUCATION

Miss Ross	Mr. Keith	Mr. Farris	Miss Beachem	Mr. Sekul
	Mr. Weathers	Miss Pearson	Mr. McQuagge	
	Mr. Weems	Mr. Wesson		

NOTE: Every student is required to take physical education, two hours each week, each semester. No student will be permitted to enter physical education classes until a medical report has been filed. All students must wear appropriate uniforms for physical education classes.

PED102 — Water Safety and Life Saving One Semester Hour
This is the American Red Cross Senior Life Saving Course with emphasis toward certifying life guards for swimming areas.

HTH103 — First Aid One Semester Hour
This is the standard first aid course of the American Red Cross. Emphasis is placed on preparing students in the knowledge and skills needed in preventing accidents as well as rendering aid to the sick and injured.

HTH104 — Personal Hygiene Three Semester Hours
The functions of the human body are related to problems of health and disease.

HTH105 — Community Health Three Semester Hours
This is a study of health agencies, community control of environment health hazards, and community control of disease.

PED202 — Introduction to Physical Education Three Semester Hours
A complete survey is made of the history, objectives, methods, psychology and philosophy of physical education.

PHYSICAL EDUCATION

The following activity courses will be offered in physical education to meet the requirements for graduation. Any four of these courses may be selected. Students will not receive credit for courses that are duplicated. Courses numbers with "G" following the number are girl's physical education courses and those followed by "B" are boys' courses.

PED109 — Introduction To Physical Activity

This course is designed to teach the fundamentals of the human body as applied to Physical Education. Included in instruction is a study of major muscle groups, the value of exercise and basic body mechanics. This course is a requirement for all freshmen.

PED Physical Education 110B**One Semester Hour**

This course is designed to teach the fundamentals and skills in football and volleyball.

Two lecture and two laboratory periods per week.

PED Physical Education 110G**One Semester Hour**

This course is designed to teach the basic fundamentals and skills in tennis and volleyball.

PED Physical Education 111G**One Semester Hour**

The fundamentals and skills of archery and basketball are taught in this course.

PED Physical Education 111B**One Semester Hour**

This course teaches the fundamentals and skills of golf and basketball.

PED Physical Education 112G**One Semester Hour**

This course is designed to teach the fundamentals and skills of softball and badminton.

PED Physical Education 112B**One Semester Hour**

The fundamentals and skills of track and weight-lifting are taught in this course.

PED Physical Education 113G**One Semester Hour**

Dancing and swimming skills and fundamentals are covered in this course.

PED Physical Education 113B**One Semester Hour**

This course is designed to teach the fundamentals and skills of archery, tumbling and trampolining.

PED Physical Education 114G**One Semester Hour**

The skills and fundamentals of recreational activities, golf, and trampolining are the areas covered in this course.

PED Physical Education 114B**One Semester Hour**

This course is designed to teach the basic fundamentals and skills in tennis, horse-shoes and badminton.

PED Physical Education 115G**One Semester Hour**

Advanced Dance. This course is designed to teach advanced skills and fundamentals in modern dance.

- PED Physical Education 115B** One Semester Hour
This course is designed to teach the skills and fundamentals of baseball and basketball.
- PED Physical Education 116G** One Semester Hour
This course is designed to teach skills and fundamentals of bowling.
- PED Physical Education 116B** One Semester Hour
This course is designed to teach skills and fundamentals of bowling.

HOME ECONOMICS

(Perkinston Only)

Miss McInnis

- HEC100 — Food Study** Three Semester Hours
This course involves the study of the body's need for food; the application of principles in planning, preparing and serving meals suitable for family needs.
One lecture and four laboratory periods per week.
- HEC101 — Selection of Clothing and Textiles** Three Semester Hours
This course offers opportunities for the selection and care of clothing; household fabrics for the family and basic principles of clothing construction. Textiles most commonly used, selection of materials, and ready-made clothing are studied.
One lecture and four laboratory periods per week.
- HEC102 — Home Economics for Moderns** Three Semester Hours
This course is designed to meet the needs of students (girls) in terminal education programs and non-homemaking majors. The content of the course deals with areas essential to successful living.
Two lecture periods per week and a four-week period of practical experiences in family group living.
- HEC200 — Meal Planning and Table Service** Three Semester Hours
This is a continuation of Food Study 100 with emphasis on more advanced planning, preparation and service. Scientific principles of cookery are stressed.
One lecture and four laboratory periods per week.
- HEC201 — Textiles and Clothing** Three Semester Hours
A study is made of characteristics and identification of fibers, uses and costs of materials, fitting, construction, remodeling and mending garments.
One lecture and four laboratory periods per week.

NURSING

Mrs. K. Sebastian

Miss M. Wenger

Miss D. Chavis Mrs. R. Henrion Mrs. M. Kingman Miss J. Livingston

- NR120 — Nursing Science** Six Semester Hours
This is a study of and practice in the basic nursing skills. Nursing is approached through nursing problems relating to patient safety, comfort, rest, nutrition, activity, and beginning skills in interpersonal relationships. The process of calculation and administration of drugs is integrated.
Four hours lecture per week.
Two (three) hour laboratory periods per week.

NR121 — Nursing Science

Six Semester Hours

This course is designed to correlate a study of and care for the basic medical surgical needs of patients. Emphasis is placed in the development of skills in planning, administering and evaluation nursing care of selected patients. Systems studied include; cardiovascular, respiratory, gastro-intestinal, urological and beginning interpersonal relationships. Diet therapy, pharmacology, pathology, rehabilitation and community resources are also included.

Four hours lecture per week.

Two (three) hour laboratory periods per week.

Prerequisite: Nursing Science 120 and Biology 102.

NR222 — Nursing Science

Four Semester Hours

This course is comprised of theory and clinical practice in the nursing care of the mentally ill. It is offered at the Mississippi State Hospital at Whitfield.

Ten hours lecture per week.

Fifteen hours laboratory per week.

NR220 — Nursing Science

Ten Semester Hours

This is a continuation of the study of Medical and Surgical conditions with supervised practice of selected patients to correlate theory and practice. Emphasis is placed on community health. Systems studied include: endocrine, communicable disease, dermatology, E.E.N.T., gynecology, locomotor and neurology and disaster nursing. Pharmacology, pathology, diet therapy, rehabilitation, and community resources are intergrated.

Six hours lecture per week.

Three (four) hour laboratory periods per week.

NR221 — Nursing Science

Ten Semester Hours

A course in maternal and child health which is designed to provide an educational experience in patient care during normal and abnormal phases of pregnancy, labor, delivery and puerperium. Care of the normal and abnormal child from the newborn period through 12 years included. Diet therapy and pharmacology is intergrated. Visits to pre-natal and postnatal clinics and nursing schools are made.

Obstetrics: Lecture six hours per week - nine weeks.

Laboratory twelve hours per week - nine weeks.

Pediatrics: Lecture six hour per week - nine weeks.

Laboratory twelve hours per week - nine weeks.

NR223 — Nursing Science

One Semester Hour

A study is made of the trends of nursing from the static period to the dynamic present. Emphasis is placed on the nurses' relationship to the nursing profession.

Lecture one hour per week.

INDUSTRIAL EDUCATION

AND

INDUSTRIAL TECHNOLOGY

Mr. Mellinger	Mr. Scarbrough	Mr. Munroe	Mr. W. Moffett
Mr. Welch	Mr. Ferguson	Mr. Guess	

IED100 — Mechanical Drawing Two Semester Hours
Preliminary training is given in freehand drawing, shades, and shadows; the use of instruments, geometric construction, isometric, oblique and cabinet projection; the development of surfaces and intersections for sheet metal work. Preliminary and special lettering exercises are given.

Six laboratory periods per week.

IED101 — Mechanical Drawing Two Semester Hours
This course offers advanced study of working drawings, detail and assembly, requiring self reliance in the selection of views, sheet layout and manner of representation. Neatness, accuracy and economy of time are stressed.

Six laboratory periods per week.

IED102 — Fundamentals of Woodworking Three Semester Hours
This course is designed to develop basic skills, knowledge and an appreciation in the use and care of hand tools, using materials and products of wood construction. The student is required to make job plans and to construct useful articles of different materials that will develop skills in the use of hand tools and job analysis.

One lecture and four laboratory periods per week.

IED103 — Advanced Woodworking Three Semester Hours
This is a continuation of Woodworking 102 with emphasis on the use of various power tools and the development of skill in planning, designing and finishing materials of wood.

One lecture and four laboratory periods per week.

IED200 — General Metals Three Semester Hours
The purpose of this course is to acquaint the student with processes in different types of metal work which will include such items as: welding and burning with acetylene, arc welding, drilling and tapping metals, work on metal lathes and forging and tempering of metals. Designed especially for Industrial Education majors, this course can be taken as an elective by anyone desiring knowledge in this area.

IED201 — Introduction to Vocational Education Three Semester Hours
This course traces the development of Vocational Education through State and Federal legislation and practice through its present status. The basic philosophy and guiding principles of Vocational Education are presented along with a survey of the organizational and operational patterns of the several vocational areas.

MATHEMATICS

Mr. Butler	Mr. D'Aquilla	Miss Hart	Mr. G. Moffett
Mr. Loftin	Mr. Scarbrough	Mr. Smith	Mr. Stringfellow

MAT 90 — Basic Mathematics Three Semester Hours

This is a course dealing with the fundamentals of mathematics, designed for those students who are weak in mathematics and wish to prepare themselves for the ordinary college mathematics courses. This course is for non-transferable credit only.

MAT100 — Foundations of Mathematics Three Semester Hours

This course is a survey of the fundamental principles underlying mathematics, with a brief introduction to the topics of set theory, elementary logic, and other systems of numeration. Through-out the course stress is placed on preciseness of language and on understanding. This course will satisfy the mathematics requirement for elementary education majors.

MAT101 — College Algebra I (100) Three Semester Hours

This is the first course in basic college algebra; it begins with the fundamental notions of mathematics and progresses through solutions of linear equations.

MAT102 — College Algebra II (104) Three Semester Hours

This is a continuation of Mathematics 101; it begins with quadratic equations and then advances through more complex algebraic topics.

Prerequisite: College Algebra I (101) or two years of high school algebra.

MAT103 — Trigonometry (101) Three Semester Hours

This is a modern course in college plane trigonometry with a brief introduction to some topics in analytic geometry.

Prerequisite: Two years of high school algebra and one year of geometry, or College Algebra II (102).

MAT104 — Integrated Algebra and Trigonometry Five Semester Hours

This is a course combining the major topics of algebra and trigonometry. It is designed for those students who desire to take the calculus series, but who feel that they are weak in the fundamentals of algebra and trigonometry.

Prerequisite: One year of high school algebra, Algebra I, Algebra II, and Trigonometry.

MAT105 — Slide Rule One Semester Hour

This is the traditional course in the operation and use of the slide rule, stressing accuracy and speed in the use of the fundamental scales.

MAT110 — College Arithmetic (102) Three Semester Hours

This course starts with a review of the four fundamental operations of arithmetic and gives a systematic treatment of the topics which one might encounter in daily affairs. This course is designed for the students in the terminal programs and it may not transfer as the mathematics requirement of a senior college.

- MAT111 — Mathematics of Finance (103)** Three Semester Hours
This course emphasizes the mathematical practices used in business transactions.
Prerequisite: Any one of the following: Mathematics 100, 101, 102, or two years of high school algebra.
- MAT115 — Elementary Statistics (106)** Three Semester Hours
This course starts with a definition of the fundamental concepts of statistics and progresses through such topics as: frequency distributions, measures of central tendency, probability, sampling and sample distributions, decision making, and correlation.
- MAT-A-190 — Analytic Geometry** Three Semester Hours
(Not taught at Perkinson) This course begins with elementary topics in Analytic Geometry and progresses through more complex topics; ending with an introduction to Solid Analytic Geometry.
- MAT-C1-191 — Differential Calculus** Three Semester Hours
(Not taught at Perkinson) This course begins with the definition of a derivative of a function, stresses the process of differentiation of different types of functions along with applications to geometry, mechanics, and physics.
- MAT-C2-192 — Integral Calculus I** Three Semester Hours
(Not taught at Perkinson) This course begins with the technique of integration, stresses the process of integration along with applications to areas and volumes.
- MAT-C3-193 — Integral Calculus II** Three Semester Hours
(Not taught at Perkinson) This course is a continuation of Mathematics 192 and it covers more advanced topics of integration ending with an introduction to differential equations.
- MAT200 — Calculus With Analytic Geometry** Five Semester Hours
This course emphasizes some of the basic concepts in analytic geometry, differentiation of algebraic and trigonometric functions, and the properties of the definite integral.
Prerequisite: Two units of algebra, one unit of trigonometry, or Mathematics 104.
- MAT201 — Calculus With Analytic Geometry** Five Semester Hours
This course is a continuation of Mathematics 200 with emphasis on the techniques of integration, partial differentiation.
- MAT202 — Calculus With Analytic Geometry** Three Semester Hours
This course is a continuation of Mathematics 201 covering multiple integrals, volume, arc length, centroids, area, and series.
- MAT243 — Differential Equations (204)** Three Semester Hours
This course consists of the development and solutions of differential equations, some partial differential equations and solution in series.
- MAT204 — Descriptive Geometry (203)** Three Semester Hours
This course deals with the proper representation of all elements and forms of geometrical and graphical problems and gives the methods of determining the true shapes, true size, and true relation of one element to another.

MUSIC

Miss Carey

Mr. Clement

Mr. Jones

Mr. Taylor

NOTE: In all applied music, one hour of practice will be required daily for each hour of credit given. The letters (a) or (b) following the number of course will indicate the number of hours credit given in applied music as follows:

(a) - One Semester Hour

(b) - Two Semester Hours

It is understood that when two courses are listed together and numbered consecutively, such as, 207-208 - Music for Children, the first is a prerequisite to the second.

MUS100-101 — Music Theory

Four Semester Hours Each

A study is made of elementary materials of music through part writings, aural dictation, sight-singing and keyboard work.
Three lecture and two laboratory periods per week.

MUS102-103 — Survey of Music Literature

Three Semester Hours Each

This is a cultural course in the appreciation and understanding of music, including the study of compositional styles, the sociological influences upon composers and their works, and an understanding of a composer's musical message.

MUS104 — Music Appreciation

Three Semester Hours

This one semester course is required of all education majors. It is primarily a music listening course designed to illustrate the functional aspects of music in education and every-day living.

MUS105-106 — Piano

Private lessons include the fundamentals of technique, reading and interpretation. Compositions are selected to suit the individual's background and ability.

MUS107-108 — Class Piano

Class study in keyboard training is designed for students who have had no previous piano instruction. Fundamentals are taught through class participation and discussion, including the study of choral accompaniments, the art of accompanying, transposition, and training in ensemble. This plan may, upon arrangement with the instructor, be combined with one private lesson per week.

MUS109-110 — Voice

Private lessons include fundamentals of breath control, tone placement, voice building, flexibility and enunciation. Song literature of the classic and modern schools is given to build musicianship and a sense of style.

MUS111-112 — Instrumental Music (Woodwinds and Brass)

Private lessons are in the fundamentals of techniques, reading, and interpretation. Materials from standard repertoire are selected to suit individual needs.

- MUS113-114 — Choir** One Semester Hour Each
Mixed choir is open by audition to all students. It develops an understanding and appreciation of music through active participation, as well as enhancing the cultural environment of the college community through concerts and special performances.
- MUS115-116 — Band** One Semester Hour Each
The college band is open to any student displaying adequate technique. Its purpose is to provide color and atmosphere to athletic and community events as well as developing skills and an understanding of music literature.
- MUS200-201 — Music Theory** Four Semester Hours Each
This is a continuation of Music Theory 101 with emphasis on chromatic harmony and the analysis of standard works in varied styles.
Three lecture and two laboratory periods per week.
- MUS202-203 — Music History** Three Semester Hours Each
The development of music is traced, beginning with primitive nations, early Christian liturgy; the development of polyphony; the rise of opera, oratorio and cantata, the Baroque, Classical, Romantic eras as well as trends in modern musical composition.
-
- MUS205-206 — Piano**
This is a continuation of Piano 105-106 with selections from the masterpieces of classical, romantic and modern composers as well as continued work on technical and interpretative skills.
- MUS207-208 — Music for Children** Three Semester Hours Each
A study of the basic fundamentals of music is made, including sight-reading and terminology. The second semester is devoted to a study of methods, principles, and materials for the teaching of music in the elementary school.
- MUS209-210 — Voice**
This is a continuation of Voice 109-110 with materials including arias from standard operas and oratorios.
- MUS211-212 — Instrumental Music (Woodwinds and Brass)**
This is a continuation of Instrumental Music 111-112 using materials of a more advanced nature.
- MUS213-214 — Choir** One Semester Hour Each
This is a continuation of Choir 113-114.
- MUS215-216 — Band** One Semester Hour Each
This is a continuation of Band 115-116.

SCIENCE (Biological)

Mr. Long

Mr. Rainwater

Mr. Hollingsworth

Mr. Strickland

BIO 100 — Zoology

Four Semester Hours

This is a course in general zoology with emphasis on the vertebrates, especially their anatomy and physiology. Special attention is given to man and his problems arising from biological needs. Laboratory time is spent with the study of basic cytology and histology, the dissection of a vertebrate animal, and the study of basic embryology of representative vertebrates.

Two lecture and four laboratory periods per week.

BIO101 — Zoology

Four Semester Hours

This is a continuation of Zoology 100 with special emphasis on the invertebrates. Representative specimens are studied to show the progressive development from lower to higher forms. In the laboratory, microscopic studies and dissections are made to give a thorough understanding of the various life forms in the various phyla.

Two lecture and four laboratory periods per week.

BIO102 — Anatomy and Physiology

Three Semester Hours

A study is made of the anatomy and physiology of the human body as an integrated whole with more detailed studies of the skeletal, muscular, and nervous systems.

BIO103 — Anatomy and Physiology

Three Semester Hours

This is a continuation of Anatomy and Physiology 102 in which the circulatory, respiratory, digestive, urinary, reproductive, and endocrine systems are studied.

Two lecture and two laboratory periods per week.

BIO106 — Microbiology

Four Semester Hours

A comprehensive study is made of bacteria and other micro-organisms including classification, morphology, cultural characteristics, and products of bacterial growth. Emphasis is placed on the study of disease-producing organisms and on general bacteriological technique.

Three lecture and two laboratory periods per week.

Prerequisite: Eight semester hours General Chemistry or consent of instructor.

BIO107 — Botany

Four Semester Hours

Class and laboratory study includes the structure, manner of life, and reproduction of familiar plants. Field trips will be used to familiarize the student with trees in his own community.

Two lectures and two laboratory periods per week.

FBS110-111 — General Biology

Three Semester Hours Each

Non-laboratory courses in general biology which include biological principles, processes, and systems of the plants and animals presented in a sequence in which 110 is a pre-requisite to 111. These courses are designed to meet general education requirements of certain non-science majors. These courses will not give credit toward a major or minor in the biological science and will not meet prerequisite requirements for higher level courses in biology.

Three lecture periods per week.

SCIENCE (Physical)

Mr. Faust

Mr Lane

Mr. Dunn

Mrs. Faust

Mr. G. Moffett

CHE104 — Inorganic Chemistry

Four Semester Hours

This course provides a study of general inorganic chemistry the properties and numerical relationships of both common elements and compounds.

Two lectures and four laboratory periods per week.

CHE105 — Inorganic Chemistry

Four Semester Hours

This is a continuation of Chemistry 104 with emphasis on metallurgy tests, and carbon chemistry.

Two lectures and four laboratory periods per week.

CHE205 — Qualitative Analysis

Four Semester Hours

A study is made of the fundamental principles of qualitative analysis of anions and cations which stresses theory, equations and laboratory methods of separation and identification.

Two lectures and six laboratory periods per week.

CHE 201 — Organic Chemistry

Four Semester Hours

This is an introductory study of organic chemistry and aliphatic compounds and derivatives.

Prerequisite: Chemistry 104 and 105.

Two lecture and four laboratory periods per week.

CHE202 — Organic Chemistry

Four Semester Hours

This course is a continuation of Chemistry 201. Further study is made of the aromatic compounds and their derivatives.

Two lecture and four laboratory periods per week.

FPS110-111 — Physical Science

Three Semester Hours Each

Non-laboratory courses in basic principles, methods, and theory of the physical sciences which include a general survey of chemistry, physics and earth sciences. 110 is a pre-requisite of 111. These courses are designed to meet general education requirements of certain non-science majors and will not give credit toward a major or minor in physical science. Credit in these courses will not meet pre-requisite requirements for higher level courses in the physical sciences.

Three lecture periods per week.

PHY203 — General Physics

Four Semester Hours

This course presents the fundamental principles, definitions and terms of mechanics, heat and sound.

Prerequisite: College Algebra and Trigonometry or special consent of instructor.

Three lecture and two laboratory periods per week.

PHY204 — General Physics

Four Semester Hours

This course is a continuation of Physics 203 and deals with the fundamental principles of light, electricity and magnetism.

Three lecture and two laboratory periods per week.

SOCIAL STUDIES

Mr. Couch

Mr. Shows

Mr. Shaw

Mr. Stamps

100 — American Government

Three Semester Hours

This course is designed to familiarize the students with the development and organization of Federal government.

HIS102-103 — Survey of World History

Three Semester Hours Each

This is a general survey course in the development of civilization. The first semester begins with the dawn of history and extends into the seventeenth century. The second semester brings the survey up to the present.

Prerequisite for Survey of World History 103: Survey of World History 102, except by special permission of the administration.

GHY104 — Principles of Global Geography

Three Semester Hours

This course deals with man's adjustment to those fundamental elements of geography such as climate, bodies of water, landforms, location and natural resources and how they, with man's adjustment to them, help to shape world history.

SOC202 — Introduction to Sociology

Three Semester Hours

The purpose of this course is to give the students an introduction to sociology and its development. Stress is placed on how man builds his culture and how customs and behavior patterns are developed, along with the functions and importance of social institutions.

HIS200-201 — American History

Three Semester Hours Each

This is a study of the political and social growth of the United States from 1492 to the present. During the first semester particular stress is placed on the development of the Constitution with the Hamiltonian, Jeffersonian and Jacksonian interpretations. The second semester begins with the Reconstruction era and traces the nation's development to the present.

Prerequisite for American History 201: American History 200, except by special permission of the administration.

TECHNOLOGY

NOTE: Courses listed in this section are terminal in nature and not designed for transfer credit.

ELECTRONICS TECHNOLOGY

Mr. R. Beck

Mr. T. Cowser

Mr. Shaw

EL101 — Basic Electricity

Three Hours Credit

This course presents the laws and fundamentals governing magnetism and electricity, and their mutual relationships. The ideas governing direct current (d-c) and alternating current (a-c) are studied, as well as the characteristics of resistance, inductance, and capacitance, also included are sessions on applicable mathematics and uses of the log-log duplex slide rule.

Three lecture periods per week.

EL102 — Non-Linear Elements and Applications

Three Hours Credit

This course begins with an introduction to computer mathematics and covers time constants. The greater portion of this course is devoted to the study of the vacuum tube, transistor, gas tube, crystal and other non-linear devices. It also includes the application of these devices in circuits involving rectifiers, power supplies, thyratrons, voltage regulators, free-run oscillators and amplifiers.

Prerequisite: Basic Electricity EL101

Three lecture periods per week.

EL103 — Basic Electricity Laboratory

Three Hours Credit

A practical experience in the application and solution of the fundamentals of electricity. This course should be taken concurrently with Basic Electricity EL101.

Six laboratory periods per week.

EL104 — Non-Linear Circuitry Laboratory

Three Hours Credit

Laboratory solutions through practical application of theories and relationships in non-linear devices. This course should be taken concurrently with Non-Linear Elements and Applications EL102.

Six laboratory periods per week.

EL105 — Basic Electricity Problems

Three Hours Credit

Mathematical solutions of practical as well as theoretical problems in the study of basic electricity. To be taken concurrently with Basic Electricity EL101.

Three lecture periods per week.

EL106 — Non-Linear Circuitry Problems

Three Hours Credit

A further study and review of mathematical solutions and uses of non-linear devices in practicable circuit applications. Take concurrently with

Non-Linear Circuits and Applications EL102.

Three lecture periods per week.

EL107 — Electronic Technical Mathematics

Five Hours Credit

A combination course composed of algebra, trigonometry, analytical geometry and basic elements of calculus. This includes the fundamental operations of arithmetic, special products and factoring, binomials, quadratics, determinants, trig functions and polar co-ordinates of complex numbers. A general treatment of analytical geometry with differentiation and integration of rational and trig functions is covered.

Five lecture periods per week.

EL108 — Electronic Drafting

Two Hours Credit

Includes the use of instruments, geometric construction, isometric, oblique and cabinet projection, multiview projection, the development of surfaces for sheet metal work, graphs and curves, and lettering.

Four laboratory periods per week.

EL201 — Wave Shaping Circuits

Three Hours Credit

This course begins with limiters, clippers and doublers, and continues with relaxation oscillators. It covers various types of multivibrators and oscillators, including the Eccles-Jordan, squarer-peaker, and the step-charging circuits. It covers an introduction to radio and television elements, modulation and demodulation concepts, and a study of synchros and servomechanisms.

Prerequisite: Non-Linear Elements EL102.

Three lecture periods per week.

EL202 — Micro-wave Principles

Three Hours Credit

This course opens with a coverage of several types of oscilloscopes. Next is the concept of micro-wave circuits, followed by a study of the basic characteristics of waveguides, antenna theory, arrays and radiation patterns. The course continues with final stage amplifiers and micro-wave oscillators, including klystrons, magnetrons, carcinotrons, standing wave and backward wave devices.

Prerequisite: Wave Shaping Circuits EL201.

EL203 — Wave Shaping Circuit Laboratory

Three Hours Credit

Experiments designed to further enhance and broaden the concepts and practices studied in Wave Shaping Circuits EL210. This course is designed to be taken concurrently with lecture course EL210.

Six laboratory periods per week.

- EL204 — Micro-wave Principles Laboratory** Three Hours Credit
Laboratory experiments showing the practicality and application of transmission lines, waveguides, pulsed oscillators and other velocity and phase modulated devices as used in micro-wave design. Included will be micro-wave measuring devices and methods.

Six laboratory periods per week.

- EL205 — Wave Shaping Circuit Problems** Three Hours Credit
Mathematical computation and analysis of wave shaping circuitry as studied in Wave Shaping Circuits EL201. To be taken concurrently with Wave Shaping Circuits EL201.

Three lecture periods per week.

- EL206 — Micro-wave Problems** Two Hours Credit
Problems involving wave-guide physical characteristics, terminations, field distribution and frequencies, along with transmission lines. To be taken concurrently with Micro-wave Principles EL202.

Three lecture periods per week.

- EL209 — Electronic Drafting** Two Hours Credit
A continuation of Electronic Drafting EL108, this course provides a working knowledge of electronic symbols and connectors, circuit schematics, cabling, wire layouts, and checking, as well as block diagrams and module representation as used in the several current techniques.

Prerequisite: Electronic Drafting EL108.

Four laboratory periods per week.

DRAFTING AND DESIGN

Mr. W. Breland

Mr. M. H. Guess

Col C. L. Munroe

- DR107 — Fundamentals of Drafting** Five Hours Credit
This course is designed to provide fundamental knowledge of the principles of drafting as well as skill in the basic techniques of using drafting room equipment. It covers such topics as lettering, inking, geometric construction, sketching, orthographic projections, pictorial drawing, dimensioning section and simple scale drawings.

Two lecture and six laboratory periods per week.

- DR111 — Machine Drafting and Design** Five Hours Credit
An introduction is given in drawing details of various mechanical parts as well as complete assemblies. Working drawings are made of various mechanical parts.

Prerequisite: Fundamentals of Drawing DR107.

Two lecture and six laboratory periods per week.

DR205 — Basic Architectural Drafting and Design Five Hours Credit

Instruction is given in the basic principles of design and planning for residential work. A complete set of plans for a residence or other small building is developed by each student. Building code requirements, utility application, and proper selection of construction materials must be observed in planning.

Two lecture and six laboratory periods per week.

DR206 — Map and Topographical Drawing Three Hours Credit

Selected drafting techniques are applied to problems of making maps, traverses, plot plans, plan and profile drawing using maps and field survey data.

Two lecture and two laboratory periods per week.

DR207 — Piping-Sheet Metal - Electrical Three Hours Credit

An advanced course in drafting in which technique and knowledge are employed in the planning of mechanical and electrical objectives. Efficient use of applicable handbooks, code books are an integral part of this course.

Two lecture and two laboratory periods per week.

DR212 — Structural Drafting and Strength of Materials Five Hours Credit

This course is designed to give basic understanding of the strength of materials. It covers the following topics: simple stresses, strains, physical characteristics of materials, reactions, moments of inertia, and deflections, application to machine parts and structural parts. Problems in structural detailing and design involving the drawing of beams, columns, connections, trusses and braces.

Two lecture and six laboratory periods per week.

**DR213 — Introduction to Steel Shipbuilding and
Blueprint Reading** Three Hours Credit

This course is designed to give the student an understanding of the ship as a whole and acquaint him with actual working drawings of a ship. Class work involves both research and drawing.

Two lecture and two laboratory periods per week.

MECHANICAL TECHNOLOGY

- MT126 — Manufacturing Processes** Four Semester Hours
Introduction to Hot Working Processes History and Nomenclature, Welding Processes, Equipment and Material for ARC Welding, Procedures in Arc Welding, Equipment and Materials for Oxy-Acetylene Welding, Procedures in Oxy-Acetylene Welded Joints, Submerged Melt and Inert Gas shielded, Special Processes, Welded Economy, Introduction to Metal Casting, Founding Practices, Foundry Equipment and Materials, Types of Molds, Types of Cores, Foundry Sands, Sand Testing, Molding Machines, Permanent Molding, Die Casting and Investment Casting, Casting Design and Economy (Metallurgy), Metallurgy and Metals, Heat Treating, Basic Inspection, and Testing of Metals, Basic Metallography, Recent Developments.
- MT127 — Manufacturing Processes** Four Semester Hours
Introduction to Production Processes (Engineered Manufacturing) Ferrous and Nonferrous Metals and Materials, Machining and Cutting Tools, Plastics, Powder Metal and Cermets, Measuring, Gaging, and Inspection, Turning Lathes, Turret and Automatic Lathes, Screw Threads, Drilling, Boring, Planning, Shaping and Slotting, Milling, Broaching and Sawing, Grinding and Finishes, Gearing, Metal Forming, Metal Finishing, Automation, Numerical Control for Machine Fundamentals of Shop Practice.
- MT129 — Materials of Industry** Three Semester Hours
Ferrous Metals, Nonferrous Metals, Wood Products, Nonmetallic Materials, Miscellaneous Materials.
- MT217 — Structural Design and Strength of Materials** Three Semester Hours
Simple stresses, strains, physical characteristics of materials, reactions, moments of inertia, deflections, application to machine parts and structural parts.
- MT218 — Strength of Materials I** Four Semester Hours
A study of the testing of materials of industry. Main emphasis on metals. Tension, compression, impact and shear in machine parts, welded joints, rusted joints, and pressure vessels.
- MT219 — Metallurgy** Three Semester Hours
Tools of the Metallurgist, Metals Structure and Crystallization, Plastic Deformation, Annealing and Hot Working, Alloys, Equilibrium Diagrams, Heat Treatment of Steels, Tool Steels, Non-ferrous Metal and Alloys.
- MT220 — Hydraulics and Pneumatics** Three Semester Hours
Principles of hydraulics and pneumatic and the properties of systems based on these principles. Consideration is given to static and dynamic conditions, hydraulic test machine set up for system demonstration modes, control features, operation.
- MT221 — Non Destructive Testing** Three Semester Hours
A study of the principles, method and processes of RT, UT, PT, MT, and Visual Inspection. Other NDT methods are covered in principle only.

MT222 — Methods and Operations Analysis and Industrial Inspection**Methods**

Four Semester Hours

History of Methods Engineering, Process Charts, Operation Analysis, Motion Study, Predetermined Time System, Factory Cost, Equipment Used in Time Study, Elements of Time Study, Performance Rating, Allowances, Standard or Allowed Time, Standard Data and formulas, Working Sampling, Wage Payment Plans, Introduction, Numbers and Measurements, Frequency Distribution, The Control Chart, Fraction Defective, Number of Defects, Sampling.

MT301 — Basic Mechanics and Mechanical Vibration Three Semester Hours

A study of basic mechanics and their function with special application in the area of induced vibration from mechanical influence. Analysis of rotating machinery for commercial vibration problems; methods of balancing equipment.

MT302 — Machine and Tool Design

Five Semester Hours

A study of the selection of materials and of machine elements such as fasteners, springs, and translation screws. This course also includes methods for designing and selecting power-transmission units and their components. Separate consideration is given to the design and selection of machine tools. Project for course required.

MT303 — Precision Measurement

Three Semester Hours

Master Measure systems, flatness, gage blocks, option tolerances, calibration statistics in dimensional quality control.

MT304 — Production Problems

Six Semester Hours

Cost Estimating Methods, Cost Estimating Elements, Production Activities, Quantitative Analysis.

AUTOMOBILE SERVICE AND MANAGEMENT

Mr. B. Welch

ASM122 — Automobile Engines and Fuel Systems

Three Hours Credit

This course covers the basic fundamentals of automotive engines and fuel systems. Emphasis is placed on theory and basic principles of these systems.

Three lecture periods per week.

ASM123 — Automotive Fundamentals I

Six Hours Credit

Practical application in actual shop conditions of theory and techniques of automotive mechanics. Emphasis placed on the maintenance, repair, and servicing of engines and fuel systems.

Prerequisite: ASM 122 and 124.

ASM124 — Automotive Chassis and Electrical Systems Three Hours Credit

This course is a continuation of ASM 122 and covers the basic fundamentals of the chassis and electrical systems. The theory and principles of clutches, transmissions, differentials, brakes, lubrication, cooling system, etc. are emphasized.

Three lecture periods per week.

Prerequisite: ASM122 Automotive Engines and Fuel Systems.

ASM125 — Automotive Fundamentals II Six Hours Credit

Practical application in actual shop conditions of theory and techniques of automotive mechanics. Emphasis placed on the maintenance, repair, and servicing of chassis, electrical and cooling systems.

Twelve laboratory periods per week.

Prerequisite: ASM124 Automotive Chassis and Electrical Systems.

ASM213 — Automotive Shop Organization and Management Three Hours Credit

This course deals with the organization, layout, and procedures of effective and efficient practices of automotive repair and servicing shops, including related auxiliary services.

Three lecture periods per week.

Prerequisite: First year of curriculum.

ASM214 — Applied Organization, Management and Analysis Three Hours Credit

Practical application of commonly used procedures and techniques of modern automotive shops. Students will develop a plan of operation for a shop of this nature including layout of shop, development of service handling systems, and the development of public relations and sales advertisement. Also included, an analysis of efficient production processes and personnel requirements.

Twelve hours laboratory per week.

Prerequisite: First year in curriculum and ASM213 Automotive Shop Organization and Management.

ASM215 — Specialized Tools and Systems Three Hours Credit

This course covers the use and theory of operation of specialized automotive test equipment in the analysis of auto electrical systems, automatic transmissions, and engine operation. In addition, the procedures covering the distribution and stocking of parts inventory will be covered.

Three lecture periods per week.

Prerequisite: First year of curriculum and ASM213 Automotive Shop Organization and Management.

ASM216 — Specialized Processes Six Hours Credit

This course will cover the needs and implementation of specialized activities of modern service shops such as on-the-job training, orientation of new employees, means of upgrading employees, the initiation of new techniques as a result of increased technology, and the diagnosis and prognosis of unique service and repair problems.

Twelve hours laboratory per week.

Prerequisite: All preceeding courses in this curriculum.

RELATED TECHNICAL COURSES

- RT106 — Technical Writing and Reports** Three Hours Credit
This is a learning-by-doing course in communication skills which emphasizes improvements in reading, note taking, and information gathering, technical thinking as well as technical writing.
Three lecture and recitation periods per week.
- RT112 — Technical Mathematics I** Three Hours Credit
Principles and techniques of arithmetic, elementary algebra, and numerical trigonometry are adapted to the technical curriculum.
Three lecture and recitation periods per week.
- RT113 — Descriptive Geometry** Three Hours Credit
This course is designed to help solve drafting problems. A graphic study is made of the relative position of points, lines, planes in space. Both auxiliary projections and rotations are used.
Three lectures per week.
Prerequisite: Drafting DR107.
- RT114 — Technical Math II** Three Hours Credit
This course presents applications of the right triangle to structures, and the solution of drafting problems. The various gear teeth are analyzed mathematically and reasons for various shapes are investigated. The mathematics of plane surveying is introduced by working with various shaped land areas to determine azimuth and bearing of the bounds as well as computation of area.
Prerequisite: Technical Mathematics I - RT112.
- RT115 — Physics** Three Hours Credit
This course presents the fundamental principles, definitions, and terms of mechanics.
Two lectures and two laboratory periods per week.
- RT116 — Physics** Three Hours Credit
This course deals with the fundamental principles of magnetism and electricity.
Two lecture and two laboratory periods per week.
- RT208 — Industrial Relations** Three Hours Credit
This course deals with problems involving human relations and development of a foundation for personal relations for dealing with superiors, associates, and subordinates. Practical discussions are held on applying for a job, including the application, interview, job evaluation and the first week on the job.
Three lecture and recitation periods per week.
- RT209 and RT210 — Plane Surveying** Three Hours Credit
A study is made of the theory and practice of plane surveying, including the use and care of instruments, land descriptions, and calculations, and the use of aerial photographs.
Two lecture and two laboratory periods per week.

RT211 — Metal Processing**Three Hours Credit**

A study is made of the various methods by which metals can be shaped, formed, and changed. Emphasis is placed on the study of design and strength of metals. Practice will include work on metal lathes, drill presses, strength testing equipment, forging, and welding.

One lecture and four laboratory periods per week.

T. V. PRODUCTION**One Year Vocational**

This nine month program presents a comprehensive approach to the theory and practices as applied to the communication broadcast field. Basic theory and application of electronic communications circuitry are covered throughout the course. Regular assignment of students to operating periods on equipment compatible to Standard Broadcasting equipment are made. Satisfactory completion of this course should allow the student to qualify on F.C.C. examinations for first or second class Radio-Telephone Operators License.

PART V

STUDENT LIFE AND ACTIVITIES

The Educational Purpose of Student Activities

Each college offers to its student body a wide variety of extra curricular activities but these activities are designed to supplement and enrich rather than compete against, academic pursuits. All clubs and organizations are sponsored by members of the faculty or administrative staff - - with the sponsors appointed by the president. Students are encouraged to participate where they have an interest, but are cautioned not to allow their academic progress to suffer because of over-emphasis on purely extra-curricular activities.

The campus clubs and organizations which are currently active may be identified under four categories.

(1) All students are represented in the Student Council and the Freshman and Sophomore class organizations, described in more detail in the following section.

(2) Apart from the Student Council and the class organizations, student activities are grouped by particular fields of interest.

(3) Campus religious organizations are prominent enough to justify description in a special section, following the other club listings.

(4) The college band, choir, and other musical activities are also prominent enough to justify special description - - particularly in their relation to the off-campus community.

Student disciplinary regulations are summarized in the final section to Part V; and this section should be read together with the **Student Handbook** for the latest revisions.

The Student Council and Class Organizations

The Student Council is a democratic organization representing all the students. The Council is comprised of a President, Vice-President, and Secretary-Treasurer, who are elected by all the students; plus the class president and one other representative elected from the sophomore and freshman classes. Four faculty members appointed by the President of the District serve as an advisory committee to the council.

It is the function of the Student Council to plan wholesome recreational and social activities for students; to encourage student discussion of campus problems and to present helpful student suggestions to the faculty and the administration; and to act generally in an advisory capacity to students. The Council sponsors formal dinners, dances, and other activities affecting the student body as a whole. In the second semester the Council invites all presidents and sponsors of other campus organizations to discuss school policy and submit proposals for policy changes to the college administration. From time to time the President of the District confers with the Council on other matters affecting student life.

The Student Council also exercises general supervision over other campus organizations and must approve the formation of any new special-interest activity group.

Alphabetical List of Currently Active

Student Organizations in Particular Fields of Interest

The **Agriculture Club** sponsors special interest programs in agriculture plus campus socials, barbecues, and picnics.

The **Bulldog Barks** staff produces the campus newspaper.

The **Circle K Club** is a civic and service organization for men students, jointly sponsored by the college community Kiwanis clubs.

The **Health Club** is open to all men students interested in physical fitness. Weights and benches, and other items of gymnastic equipment, are available for club members.

The **Home Economics Club** sponsors style shows, teas, dinners and other social activities for those with a special interest in home economics.

The **"P" Club** is composed of those who have won Perkinson letters in athletics.

The **Perkolator** staff produces the college yearbook.

The **Classical Music Club** brings together students who enjoy good music with the opportunity of attending musical programs in out-of-town communities.

Phi Beta Lambda is a national business education society.

Phi Theta Kappa is a national junior college honorary scholastic society emphasizing scholarship and leadership.

The **Student Nurses Association** is a local, state, and national association which promotes interest in the national organization of registered nurses.

Campus Religious Life and Activities

Students are encouraged to participate in Christian activities of their choice; and campus religious organizations are particularly active.

The **Christian Council** is made up of representatives of all of the campus religious groups. It sponsors the annual Religious Emphasis Week, the Easter Sunrise Service, and other campus-wide religious activities.

Denominational clubs include: the **Baptist Student Union**; the **Canterbury Club**; the **Newman Club**; the **Westminster Fellowship**; and the **Wesley Foundation**. Some Denominations maintain full-time or part-time student secretaries on the campus.

Non-denominational organizations, such as the **Y.M.C.A.** and the **Y.W.C.A.** also do much to promote spiritual development.

Band and Choir: Campus Life and the Community

The Perkinston campus is known for its musical activity; and frequent off-campus appearances of the musical groups emphasize Perkinston's contribution to the cultural life of its supporting community.

The Band and Orchestra, including the girls' parade unit, the Perkettes, and the College Choir are the two main musical groups. Drawn from the choir are such smaller groups as the Girls' Ensemble, Boys' Quartet, etc.

Student Discipline and Regulations

The Mississippi Gulf Coast Junior College District expects its students to conduct themselves as ladies and gentlemen. The college purpose is to encourage proper conduct as a result of proper thinking. Every faculty member is responsible for discipline and is expected to participate in formulating disciplinary policies. Every student is responsible not only for his own conduct, but also for his influence on his fellow students. Student attitude is a powerful force in self-government; and the more the students can govern their own behavior, the less will be the need for faculty or administrative intervention.

The specific regulations governing student conduct which have been tested by experience are spelled out in the **Student Handbook**, a copy of which is provided each entering student - - dormitory or "day."

The following regulations, most of which are repeated in the **Student Handbook**, make explicit the more important guides to conduct, and are included here for the information of parents as well as prospective students.

The presence of faculty sponsors is necessary when student groups meet for parties, picnics, etc. The exception to this general rule is Sunday church attendance in the local community, and attendance at religious meetings on the campus under the direction of organized religious groups. Students are encouraged to attend Sunday church, but are not required to do so. Students who do not attend, however, are expected to show proper respect by staying in their dormitories and not creating noise or disturbance on the campus or playing fields.

Women dormitory students are not expected to leave the campus before 5:00 P.M. without permission from the Dean of Women. Those who have a standing permit from their parents may leave the campus from 5:00 P.M. to 10:00 P.M. by signing out of their dormitory. Dormitory men students may leave at any time by signing out, but should return to the campus by 11:00 P.M. Automobiles cannot be used after 10:30 P.M.

The colleges automatically limit participation in extra-curricular activities of students on academic probation. These students are required to observe strict hours during the probationary period.

The faculty Discipline Committee executes all major disciplinary action; this committee has general supervision of, and final authority, in all questions of student behavior.

SPECIAL STUDENTS

ENROLLED AT

JEFFERSON DAVIS COLLEGE

Anderson, Billy Jack - Stone County
 Alexander, George - KAFB
 Barber, Harold Robert - Gulfport
 Barnett, Nelson Wayne - Lucedale
 Barrett, Esther Scott - Gulfport
 Barton, Ronald Wayne - Handsboro
 Barron, Jacqueline Veronica - Miss. City
 Bates, James Donlad - Gulfport
 Beasley, Judy Ann - Gulfport
 Beavers, Joyce Rich - Gulfport
 Benton, Yvonne C. - Long Beach
 Bergstrom, Steven O. - Biloxi
 Beverin, Barbara Patricia - Ocean Springs
 Blackburn, George - Pass Christian
 Bohuslav, Frank L. - KAFB
 Bohuslav, Georgia Anne - Gulfport
 Bond, Harvey L. - Gulfport
 Brett, Jean Charlotte - Handsboro
 Bunch, Troy Eugene - Perkinston
 Burke, Mattie C. - Gulfport
 Burt, Oma P. - Biloxi
 Calhoun, James Austin - Bay St. Louis
 Callas, Billy - Long Beach
 Callas, Joanne Evon - Long Beach
 Capuano, Louise Brown - Yazoo City
 Carte, Prentice Leon - Gulfport
 Carriere, Philip Clarence - Miss. City
 Centobie, John Arden - KAFB
 Chambers, Hattie Lee - Gulfport
 Conner, Marilyn Joyce - Gulfport
 Collins, Ander K. - Biloxi
 Cooley, Larry Clarence - Long Beach
 Copeland, Charles K. - Long Beach
 Crawley, Judith Merle - Gulfport
 Culley, Jacqueline - Long Beach
 Darnell, Hilda P. - Biloxi

- Dana, Alyce Archer - Gulfport
 Dean, Lillian O. - Long Beach
 Denmark, Billie David - Long Beach
 Driver, Charles Victor - Handsboro
 Dubuissen, Kenny Geraud - Gulfport
 Duncan, William Michael - Gulfport
 Dubuissan, Melvin Leo - Long Beach
 Dugal, Ivy R. - Rayne, La.
 Dunfield, Gregory Melville - KAFB
 Eakins, Linda Faye - Biloxi
 Edwards, Robert James - Gulfport
 Egger, James Lewis - New Jersey
 Eisenstadt, Gunter H. KAFB
 Endris, David L. - Biloxi
 Eno, Jeffrey Dodd - Biloxi
 Fishel, John Wright - Gulfport
 Ferguson, Lora Alena - Long Beach
 Flynt, Charlie William - Gulfport
 Foster, Emma A. - Miss. City
 Frieman, Otis Wayne - Handsboro
 Gartman, Gerald Edward - Gulfport
 Gardner, Gerald F.
 Gilman, Saul Sanford - KAFB
 Gault, Leila Susan - Pass Christian
 Giroux, Gerald E. - Pass Christian
 Gellner, Robert Charles - Hawthorne, Cal.
 Goddard, Glen Edward - Gulfport
 Girling, Edward F. - Gulfport
 Gollott, Tommy Arlin - Biloxi
 Gollott, Tyrone John - Biloxi
 Hawthorne, Joseph Conrad
 Hamill, Marguerite Van - Biloxi
 Harzer, Charles Joseph - Gulfport
 Herring, Pearl Paulina - Gulfport
 Hegwood, Thomas Richard - 410 Benachi
 Herrington, Hardy Ray - Miss. City
 Herschfield, Mary Bartha - Biloxi
 Hill, Joan Dale - Longview, Wash.
 Hoelsing, Dennis Otto - KAFB
 Hudson, Roy Dale - Handsboro
 Hyden, Robert - KAFB
 Illine, Charlesie Ellis - Biloxi
 Iwanczyk, Timothy Dennis - Gulfport
 Jefferson, Raymond Joseph - Gulfport
 Johnson, Ann Holmes - Long Beach
 Joachim, Lillie Catherine - Biloxi
 Johnson, John Keith - Gulfport
 Johnson, John T. - San Diego, Cal.
 Jones, Mary Jean - Gulfport
 Kasovich, Gabriel Coward - Biloxi
 Kell, Billy Wayne - KAFB
 Kidd, Dorothy Jean - Gulfport
 Kostmayer, Robert Zee - Gulfport
 Kravse, Jerry D. - KAFB
 Ladner, Arnette G. - Miss. City
 Landers, Jackie Lee - Biloxi
 Lamn, Werner Robert - KAFB
 Lane, William Earnest - KAFB
 Larkin, Jim Thomas - Gulfport
 Ledig, Roy E. - Gulfport
 Lenhart, Michael Eugene - KAFB
 Lee, Lynn C. - Gulfport
 Lewis, Wendell Clyde - Gulfport
 Locklin, Douglas Reynolds - Biloxi
 Mahoney, Douglas Paul - KAFB
 Majure, Elaine Robinson - Gulfport
 Manuel, Maurice Charles - Long Beach
 Martino, Eugene Louis - Biloxi
 Melvin, Ernest Charles - Biloxi
 McQuestion, Diana Margaret - Biloxi
 Milner, Emmett Joseph - Long Beach
 Moore, Donald Hugh - KAFB
 Moore, John Farrell - Gulfport
