MISS GRACE RUBLE.....
.....Instrumental Music, Voice and Expression
MRS. J. A. HUFF.....Matron

LOCATION

The Harrison County Agricultural High School is located at Perkinston, Mississippi, on the G. & S. I. Railroad, thirty miles north of Gulfport in one of the most healthful sections of the State. The town is just large enough to supply the school with necessities and conveniences without furnishing any distracting influences to interfere with study and work. A more attractive site could not have been found in Harrison County for the location of an Agricultural School. The Campus contains twelve acres gradually rising in altitude from the railroad right-of-way for a distance of three hundred yards to the location of the buildings.

BUILDINGS

The buildings completed consist of an administration building and one dormitory. In the basement of the administration building are four large rooms for Home Science, Manual Training, Physics and Chemistry work. They are equipped with toilets, shower baths, sanitary drinking fountains and all the rooms throughout the building are equipped with electric lights and steam heat. On the second floor are four class rooms, large study hall, office and library. On the third floor are two large class rooms and the auditorium.

The dormitory will accommodate about sixty pupils. It is equipped with toilets, baths, steam heat and electric lights. The rooms are all furnished with two single beds and mattresses, one study table, one dresser, one washstand outfit and two closets.

PURPOSE.

The purpose of this school is to train boys and girls in right habits of thought and action; to give to them a preparation for the life they are to live whether it be in the office,

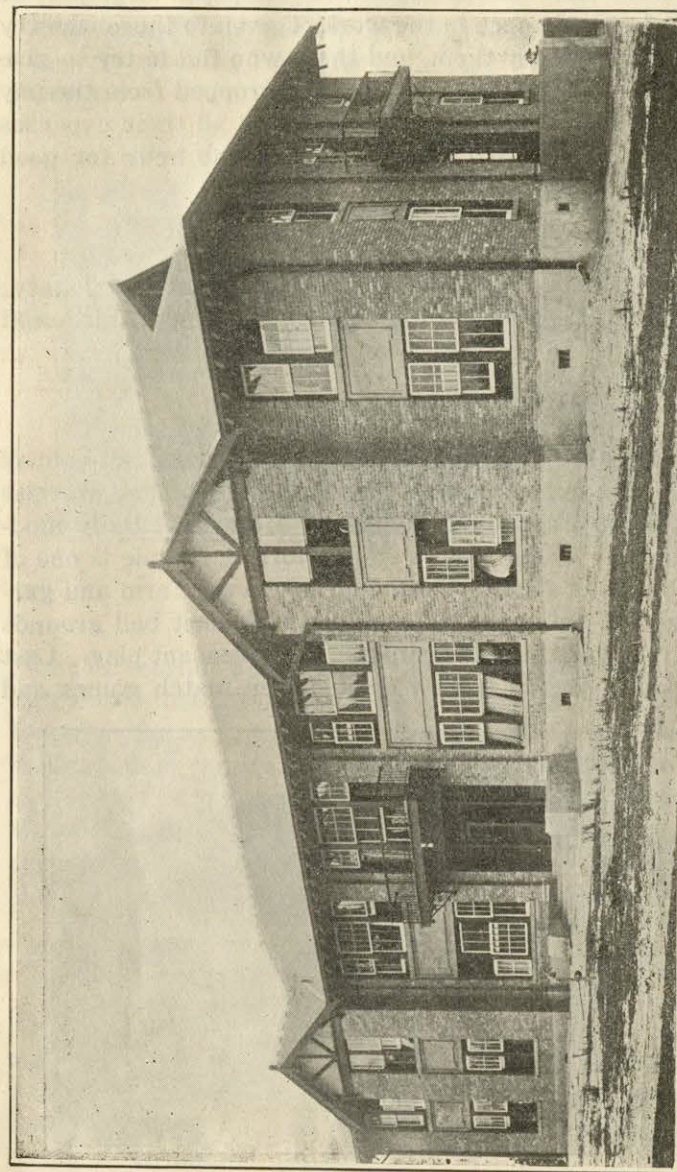

in the work shop or on the farm.

While its course of study gives a preparation for college, yet it seeks mainly to give to boys and girls the training along industrial lines that will enable them to relieve the farm and home of drudgery and make the farm prosperous and the home happy. Every attention will be given to the mental discipline of pupils to train them to accurate thought and action and thus qualify them for the noble performance of the duties of life. The moral and spiritual training will be looked to with the utmost care and thought. This school endeavors to educate as well as instruct, to form character as well as give information. The morally developed heart, the skilled hand and the trained mind are indicative of a successful life. The ideal in education is, "A sound mind in a sound body," and to this end scrupulous care will be taken to keep buildings and grounds clean and free from local cause of disease. Sanitary laws will be strictly enforced and every attention given to the preservation of health. We have a fine artesian well overflowing with good pure water, and last year we did not have a single case of serious sickness among the student body.

GENERAL INFORMATION.

BOARD.

Board is furnished in the dormitory at actual cost to pupils. Last year board averaged about eight dollars the month for the entire session. This year we do not expect it to exceed seven or seven and a half dollars; however, at the beginning of each month each pupil will be required to deposit eight dollars for board for that month. This will enable us to pay cash for our groceries and thus secure the best prices, and at the close of the session, whatever has been paid by the pupil in excess of actual cost will be refunded to him. Any boy or girl who is willing to do good

BOYS' DORMITORY

honest work can make enough money to pay a large part of the board. Preference in the work is given to those who try to earn what we pay them, and those who fail to try to give value received for the money are soon dropped from the pay roll. Last year a few of our pupils paid all their expenses from their labor. We allow ten cents the hour for good work.

TUITION.

Tuition is free to all pupils living in Harrison County; those coming from other counties will be charged tuition at the rate of three dollars the month in advance.

ATHLETICS.

We encourage clean athletics; it develops self-control and respect for the rights of others; it furnishes exercise for the growth and development of the body. Daily moderate exercise which always stops short of fatigue is one of the best laws of health; so in addition to our farm and garden work we have tennis, baseball and basket ball grounds so that real work may be tempered with pleasant play. Last session our baseball team played fifteen match games and

BASKET BALL TEAM

won twelve. No pupil will be allowed to play on our match teams whose class work is not satisfactory. Drinking and cigarette smoking not only bars one from athletics, but from school.

BASEBALL TEAM

DISCIPLINE.

The teacher and student body live together in the dormitories as one large family, and family government is enforced as far as practicable. The idea of self government is insisted upon, but by some manner of means wholesome discipline will be maintained. We have a few regulations the enforcement of which is necessary for the good of all concerned and if you do not intend to stand to and abide by them, choose some other school.

ROOM FURNISHINGS.

Each pupil will be expected to furnish two pairs of sheets, one pillow, two pillow cases, one white bed spread, sufficient cover, one dresser scarf, one wash stand scarf, one pair of plain white sash curtains, one laundry bag, towels and toilet articles; all of which must be plainly marked with owner's full name. Do not fail to carry out these instructions. Last session our pupils paid thirty cents a week for

laundry not including collars.

NUMBER OF PUPILS IN DORMITORY LIMITED.

We can accommodate about sixty pupils in the dormitory. We have now on file about thirty written applications for board. Assignments to rooms are made as applications are received. The only sure way to secure a room is to make application at once. State in your application your grade and sex. Send all applications to J. A. Huff, Perkinston, Miss.

SCHOOL FARM.

The school has opened up a beautiful farm of about 20 acres on which are now growing splendid crops of corn, cane, potatoes, peanuts, peas, soy and velvet beans and all good things to eat. Our farming implements, consisting of cultivators, discs, spring tooth harrows, etc., are the latest and best. The school owns a pair of fine mules, three splendid Jersey milk cows, and some Duroc Jersey pigs. We confidently expect to make this school farm profitable.

FACULTY.

A strong faculty is essential to the successful operation of any school. Our instructors have been selected with reference to their special fitness and preparation for the specific work assigned them.

LEARNING BY DOING

COURSE OF STUDY.

First Year.

	Periods per week
Agriculture (boys)	5
Home Science (girls)	5
English Grammar	3
English Composition	2
Arithmetic	5
Elective Study	5

Second Year.

	Periods per week
Agriculture (boys)	5
Home Science (girls)	5
English Composition and Rhetoric.....	3
English Classics	2
Algebra	5
Ancient History	3
Elective Study	5

Third Year.

	Periods per week
Agriculture (boys)	5
Home Science (girls)	5
English Composition and Rhetoric.....	3
Classics	2
Plane Geometry	5
Mediaeval and Modern History.....	3
Elective Study	5

Fourth Year.

	Periods per week
Agriculture (boys)	5
Home Science (girls)	5
History of English Literature.....	2
Classics	3
American History and Civics.....	5
Elective Study	4

ON RED CREEK.

Thou hast taught me, Silent River,
 Many a lesson, deep and long;
 Thou hast been a generous giver;
 I can give thee but a song.

—Longfellow.

REMARKS ON COURSE OF STUDY.

The four year's course in Agriculture covers instruction in the following subjects: Plant and animal life, field crops, soils and fertilizers, breeds of live stock, care and feeding of live stock, dairying, drainage, terracing, marketing farm products, farm management and accounts and business forms, cooperation in farm industries and community ownership of improved live stock and modern implements, simple carpentry and farm mechanics, poultry raising and marketing, fruit growing and gardening, bee culture, and sanitation and hygiene.

In the Home Science Department instruction will be given in the following: Cooking, serving, sewing, millinery, home care of the sick, feeding of invalids, and infants, laundering, house planning and decoration, gardening and floriculture, poultry raising and marketing, preserving and canning, sanitation and hygiene, study of texture, manufacture, cost and durability of fabrics, household management, making and keeping of accounts.

In order to make the work in Agriculture and Home Science more definite and effective, text books on chemistry, zoology, physics, physical geography, physiology and hygiene, etc., will be used in the class work.

The course in English consists of a thorough study of English Grammar, Composition and Rhetoric, selected classics and history of American and English literature. The work in Mathematics and History is definitely outlined in the Course of Study.

Manual Training will include blacksmithing, carpentering, mechanical drawing, tool and bench work. For the

benefit of the teachers of the public schools we expect to offer a teachers' training course in order that the work of the Agricultural High School may, through the public school teachers, reach all the children of the county.

The Course of Study as outlined includes four units of Agriculture, four of Home Science, four of English, three of Mathematics, two and one-fifth of History and three and four-fifths of Elective Studies; making in all sixteen units of work, fifteen of which are required for graduation. (A unit is a full session's work in any particular subject.) The field of Elective Studies includes all those subjects not included in the required studies; as Latin, Manual Training, more History, more Mathematics, Pedagogy, or girls may elect Agriculture and boys may elect certain phases of Home Science, etc.

All boys are required to do at least two hours practical work each week, and girls may be required to do the same in Home Science.

The Classes in Instrumental Music, Voice and Expression will be under the efficient management of Miss Grace Ruble. A tuition fee of three dollars the month will be charged for instruction in any of these classes.

STUDENT ROLL—SESSION 1912-1913.
